

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden workbench. A red cable connects it to a power supply unit on the floor. To the right, another wooden workbench is illuminated by a bright overhead light. Various cables and components are visible on the floor between the two benches.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A metal frame stands in the center, supporting a test fixture. A bright light source is visible at the top of the frame, illuminating the interior. The floor is concrete with yellow safety markings.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
