## Description of low power consumption

1. When the feeder is not connected to a power source, it is battery powered by default. If you need to use it unplugged, please make sure that you have installed batteries as required.
2. When the feeder is battery-powered, the power is limited, in order to ensure that the feeder has a long life and does not interfere with feeding, the feeder continues to enter the low-power mode after 30s of no operation, it will not support the remote control of the app, but the feeding results and the status of the feeder continue to be displayed.
3. If you need to use the app function, please connect the power cord and use it after successful network distribution.

\*On battery power, the device enters low-power mode after 30 seconds of inactivity. Press and hold the Feed button for 3 seconds to unlock and wake up the device.

11. Go to Settings to turn "Auto Lock" on or off and see other basic functions.

12. Tap Settings to share devices, remove devices, check networks, etc.

# Simple Troubleshooting

## Programs for problem solving

**Q: I press any button without response**

A: Buttons are locked when there is no operation for 30 seconds. Please press and hold the feed button for 3 seconds to unlock the button.

**Q: App can't connect to the feeder**

A:1) It is recommended to use a combination of letters and numbers for the WiFi name and password, with a maximum length of 12 characters. Please use the 2.4G WiFi signal as the 5GWiFi signal is not supported.

2) If your phone is experiencing network connection failure, it could be due to a conflict within the software. To resolve this, try restarting your phone and disabling any non-system software that automatically starts up with the phone. Additionally, make sure Bluetooth and positioning are enabled, and then attempt to reconnect to the network.

**Q: Feeder does not dispense properly or does not dispense food**

A: Before taking any further action, kindly ensure that the food tray is not overloaded with food and that the food passage is not blocked. It is recommended to clean the food outlet and passage regularly to avoid blockage. In case you are using battery power, please check if the battery is functioning properly and not leaking.

**Q: The feeder shows offline**

A: Please make sure that the feeder is within 10 meters' effective distance from your home router. If there is a wall in between, the WiFi signal will drop sharply and the connection may become unstable, which can cause the product to go offline. Try to avoid any obstacles that may affect the WiFi signal.

**Q: No response to power on**

A: First, please check if the power supply is plugged in and the switch is turned on. If they are both plugged in, examine the power adapter and power cord for any signs of damage. If you find that the power cord is damaged, please contact customer service to assist you in resolving the issue.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
