# Smart Pet Water Dispenser

User Manual **WiFi Edition**

Please read the instruction manual carefully before using the product

## Safety Guide

1. It is not recommended to use this device for pets under three months old.
2. When children use this product, please use it under the company of their parents.
3. Do not immerse the charging base in water, as this will damage the control panel and other electronic components.
4. Please keep the device placed horizontally; do not tip it over to avoid damage.
5. If this device malfunctions or has damaged accessories, do not attempt to repair it yourself. Please contact your dealer or customer service for resolution.
6. When not using the product or before cleaning it, please be sure to unplug the power cord.
7. If the device's power plug gets wet, please turn off the power at the socket and do not attempt to unplug the power plug.

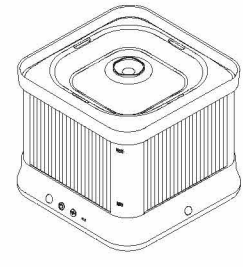

## Notice

1. Before first use, please clean the product. For cleaning guidelines, refer to P10.
2. It is recommended to use purified water to extend filter life and maintain water quality.
3. The normal operating ambient temperature for this device is 0 ~ 40°C. Do not place the device in direct sunlight or areas where the ambient temperature is not suitable.
4. Do not allow pets to chew or swallow any accessories. If you are concerned about the power cord, please purchase a cord protector (hard plastic protector) from a hardware store to protect it.
5. If you encounter product usage issues, please contact your dealer or customer service for resolution. Do not attempt to disassemble or modify the device yourself, as this may cause safety accidents.
6. When traveling or on a business trip for an extended period, please be sure to check the remaining water level in the device.
7. Please read and comply with all important instructions listed on the device and packaging.

## Packing List

After opening the product packaging, please confirm that the pet device is intact and check the checklist to ensure all accessories are complete.

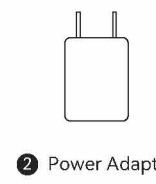

### Water Tank

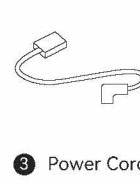

### Accessories

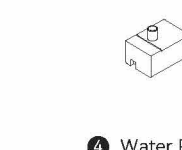

① Water Outlet Pipe

② Power Adapter

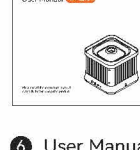

③ Power Cord

④ Water Pump

⑤ Filter Element

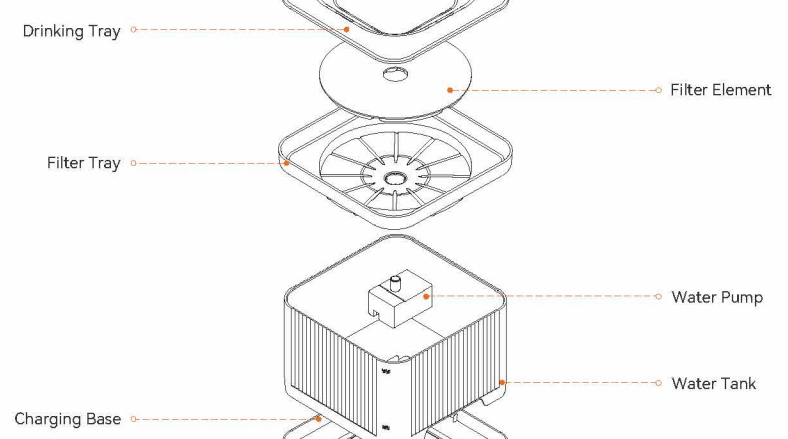

⑥ User Manual

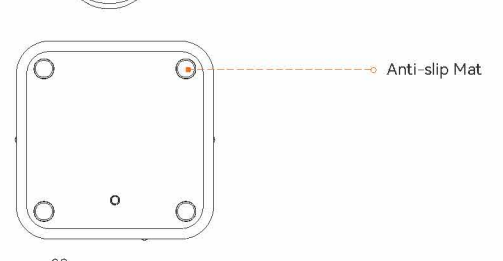

\*In order to provide better products, we will regularly improve our products. If the product image is different from the actual product, please refer to the actual one.

### Bottom View

## Button Instructions

- Power Button:**
- 1) Long press the button for 6 seconds; the device will beep twice and power on.
  - 2) Long press the button for 6 seconds; the device will beep twice and power off.
  - 3) 15 seconds after work ends, the device will automatically enter low power mode. In this mode, long press any button to wake up the device.

Note: Connecting the power adapter can also wake up the device.

- Cleaning & Filter Reset Button:**
- 1) Cleaning Reset: Double-click the button; the device will beep twice, indicating successful cleaning reminder reset, and the cleaning reminder countdown will restart.
  - 2) Filter Reset: Double-click the button; the device will beep twice, indicating successful filter replacement reminder reset, and the filter replacement reminder countdown will restart.

Note: 1. If both cleaning and filter replacement reminders appear simultaneously, double-click the reset button; the device will first reset the cleaning reminder, then double-click again to reset the filter replacement.  
2. The cleaning reminder countdown starts after resetting on the device, defaulting to a reminder after 7 days (cannot be set on the device).  
3. The filter replacement reminder countdown starts after resetting on the device, defaulting to a reminder after 30 days (can be set to 7-30 days via APP).

- Factory Reset Button:**
- Long press the button for 6 seconds; the device will sound for 4 seconds, the device will restore factory settings, network pairing information will be cleared, and water dispensing mode, cleaning reminder, filter replacement reminder will restore to default values.

Note: When battery is covered, network pairing is supported within 5 minutes of first power-on.

Indicator Light Color	Indicator Light Signal	Device Status
White	Flashing	Battery Powered/Device On/Off
	Flashing	Network Connection Failed/Device Offline
Yellow	Solid On	Device Normal/Network Connection Successful/Charging Complete
	Flashing	Water Shortage Reminder
Red	Solid On	Low Battery
	Flashing	Device is charging

Note: When the device malfunctions (water shortage reminder, filter replacement reminder, cleaning reminder), the APP will push timely alerts.

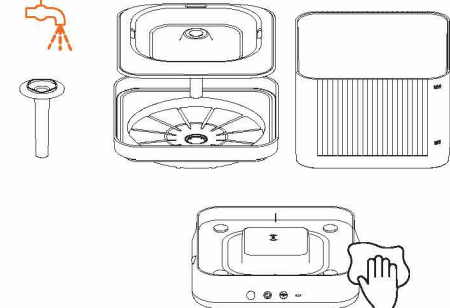

Water Dispensing Mode	Sensor Dispensing	Intermittent Dispensing	Continuous Water Dispensing	Smart Mode
Sensor Dispensing	When pet approaches the front of the device, the device dispenses water for 15 seconds.	Dispenses water for 10 seconds every 30 minutes.	When connected to power adapter, device continuously dispenses water.	When in smart mode and sensor mode, only applicable when connected to power adapter.
			When in smart mode and sensor mode, when not approached, and able at intermittent intervals.	

Note: 1) Only the APP supports switching water dispensing modes (not supported on the device).  
2) When the device is powered by an adapter, the water dispensing mode defaults to continuous; when battery powered, the water dispensing mode defaults to intermittent mode.

## Installation Instructions

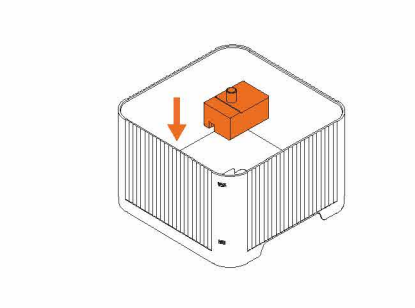

### 01 | Cleaning the Device

- ① Remove relevant accessories and clean the drinking tray, filter tray, water tank, etc., with clean water. When cleaning, do not let water contact the charging base; wipe with a cloth or wet wipe.

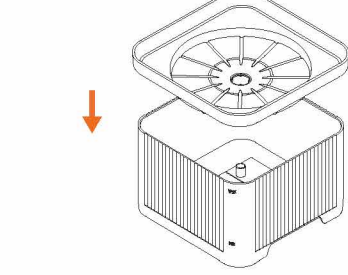

### 02 | Installing the Water Pump

- ① Align the concave part at the bottom of the water pump with the cotton filter with the protrusion at the water pump installation position in the water tank.

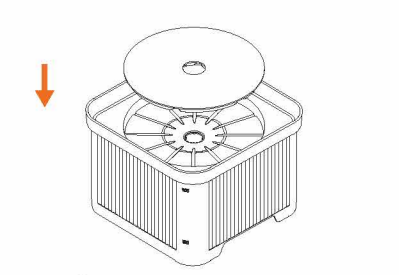

### 04 | Install the Filter Tray

- ① Place the filter tray onto the water tank.

### 05 | Install the Filter

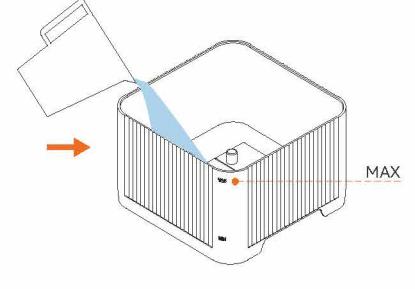

- ① Place the filter face up into the filter tray.

### 03 | Adding Water to the Tank

- ① Add appropriate pure or tap water; the water level must be within the specified range. (≤3L)

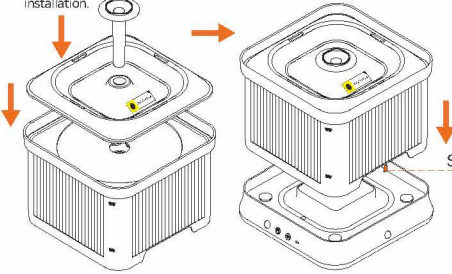

Note: Do not exceed the MAX line.

### 06 | Install the Drinking Tray and Water Outlet Pipe

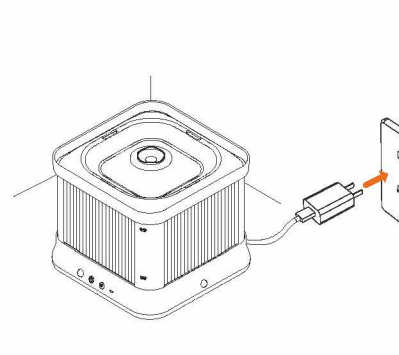

- ① Place the drinking tray onto the filter tray, then attach the water outlet pipe, and finally align the hole at the bottom of the water tank with the anti-insertion slot on the charging base.

Note: If the water tank is not aligned, it will protrude and be unstable after installation.

### 07 | Plug-in Use

- ① Place the assembled device on a level surface, and finally power the device with a DCSV power adapter.

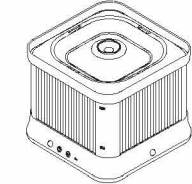

## Maintenance Instructions

1. For your pet's health, it is recommended to clean the device regularly.
2. When the water tank begins to get dirty and has slippery limescale, it is recommended to clean it.
3. It is recommended to clean the water tank, water pump, and filter element once every 7 days.
4. The filter element needs to be replaced regularly, recommended not to exceed 30 days.

## Instructions for Use

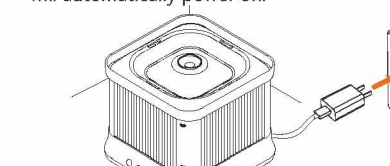

### 01 | Assembly

- ① Complete water filling and assembly of the device according to the installation instructions.

### 02 | Connect Power

- ① Connect the 5V/1A power adapter to the device and plug it into an outlet; the device will automatically power on.

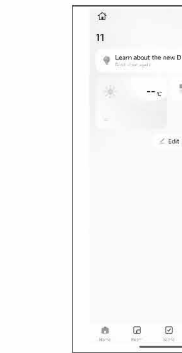

### 03 | Device Network Pairing

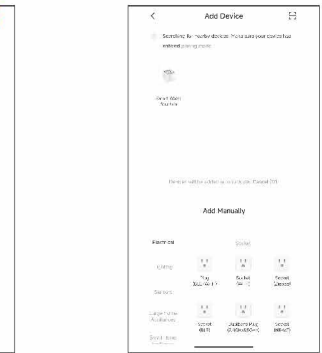

① For details, please refer to the Smart Life APP Download and Operation Guide below.

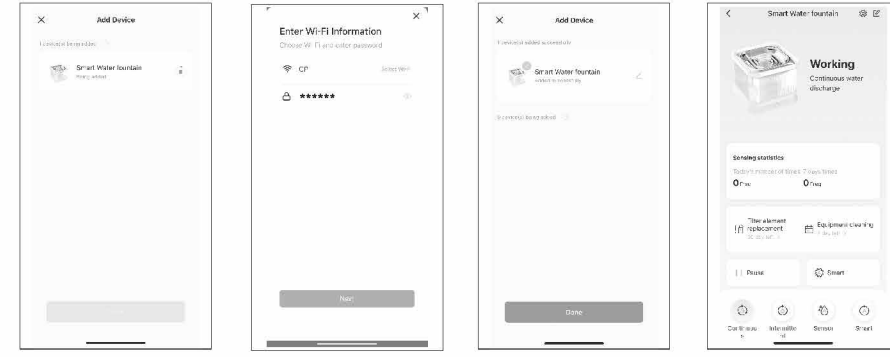

1. Use your mobile phone to scan the QR code above to download the exclusive APP, register an account, and log in.

2. Enter the APP homepage, click "Add Device".

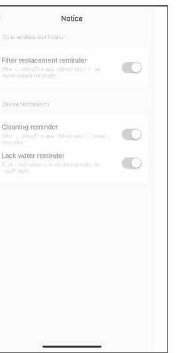

3. Enter the device search page, automatically search for the device, then click on the device you want to add.

8. Enter the "Filter Replacement" page to set the filter replacement time.

9. Enter the "Device Cleaning" page to set the device cleaning time.

10. Enter the "Settings" page to manage information notification switch, filter replacement, device cleaning, and other settings.

11. Enter the "Settings" page to manage information notification switch, filter replacement, device cleaning, and other settings.

## Simple Troubleshooting

### Problem & Solution

- Q1: Can I wash the button part with water when cleaning the device?**  
A: No, the button part contains precision instruments internally and cannot be directly immersed in water for cleaning. If it encounters water droplets or slight splashes, wipe it dry immediately.

- Q2: How do I know if the device battery is running low?**  
A: You can check the device indicator light. When the indicator light turns red and flashes quickly, the device needs to be charged.

- Q3: How do I know when the device can start network pairing after Wi-Fi is turned on?**  
A: You can check the indicator light. When the indicator light is flashing white slowly, the product is in network pairing mode. At this time, you can search for the device via the relevant APP to perform network pairing.

- Q4: Can I control the device using the APP when it's battery-powered?**  
A: Yes, but you need to wake up the device first (long press the power button for 1 second or plug in the adapter to wake up the device), otherwise any commands from the APP will be invalid.

- Q5: Why doesn't water dispense immediately when my pet is near the device?**  
A: The pet needs to be directly in front of the device's water outlet, and within the sensor's detection range. Data needs to be transmitted for analysis, so there is typically a 1-3 second delay.

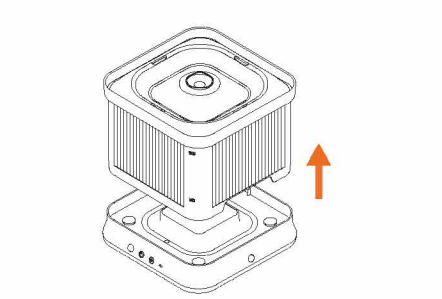

- Q6: Why does water dispense when a person walks past or approaches the device?**  
A: This sensing function does not differentiate between living species; it is effective for any moving living object.

- Q7: Why is there still water in the tank, but it's not dispensing?**  
A: The water pump has a certain height. If the water level is too low, it cannot cover the lowest water level of the pump. Therefore, please ensure the water level covers the entire pump when using.

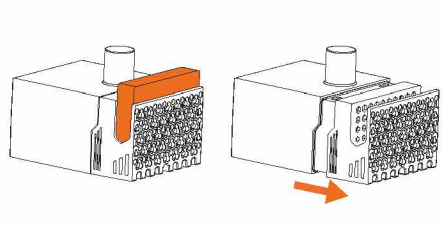

- Q8: Can I use another adapter to charge my device?**  
A: To ensure the safety and effectiveness of electronic components, our device's input specifications are limited to 5V/1A. It is recommended to use the original adapter for charging.

## Cleaning Instructions

### 01 Before disassembling for cleaning, please remove the device from the charging base.

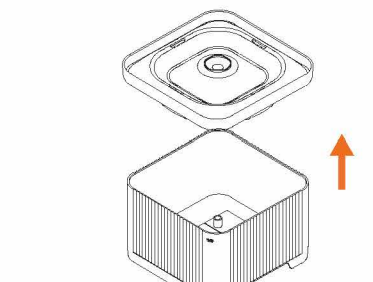

- Disassemble the water pump according to the steps below, then clean it.  
① Step One: Remove the filter cotton and detach the outer cover on the side of the water pump;

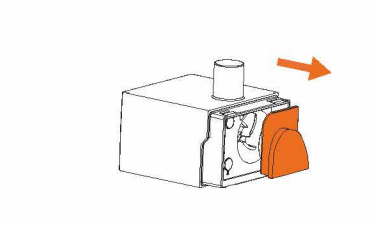

### 02 Water Pump Cleaning and Charging Base Wiping

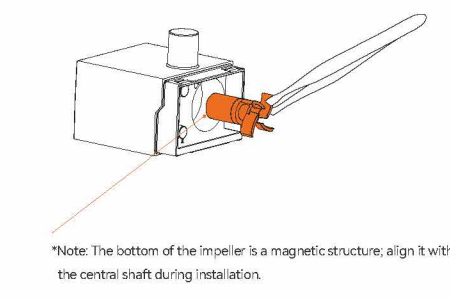

- ① Separate the water tank and filter tray, then remove the water pump.

- ② Step Two: Detach the impeller cover;

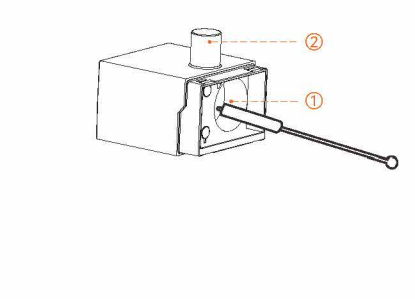

- ③ Step Three: Use tweezers to remove the impeller;

- ④ Step Four: Use a brush to clean the water pump impeller cover, outer cover, and filter cotton in sequence to complete cleaning.

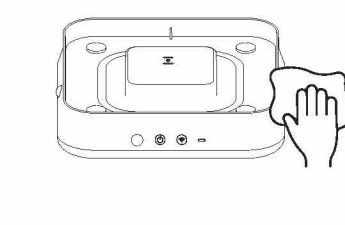

- ⑤ Step Five: After cleaning, reassemble the impeller, impeller cover, outer cover, and filter cotton in sequence to complete cleaning.

### 03 Charging Base Wiping

- ① Wipe the surface of the charging base with a cloth or wet wipe.

### 04 Remove the water outlet pipe and drinking tray, take out the filter element, rinse briefly with clean water and shake dry.

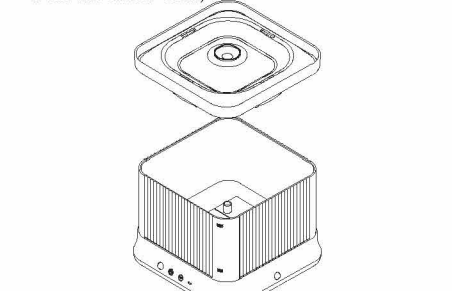

### 05 Rinse the water tank, drinking tray, filter tray, water outlet pipe, etc., in clean water or clean with food-grade detergent.

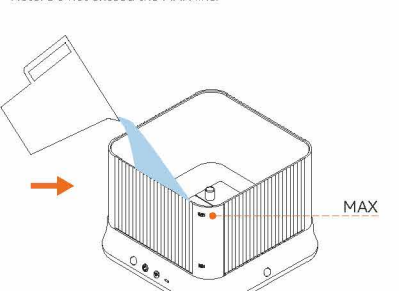

## Daily Water Refill Instructions

- Remove the assembled device tray assembly from the water tank;

- Hold a container and add purified water. (≤3L)  
Note: Do not exceed the MAX line.

## Specification

Water tank capacity: 3L  
Power supply: DC 5V/1A power adapter  
Power adapter input: AC100-240V, 50/60Hz  
Power adapter output: DC5V/1A  
G.W.: 1.09±0.1kg  
Size: 18.9\*18.8\*16.1cm  
BE-061-0

## FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
