11. Enter the settings menu option and click "Shared Devices"

12. Click "Add Share" and enter the other party's APP account to share the device with multiple people

Simple Troubleshooting

Q: Cannot be configured
A: 1) WiFi name and password do not use Chinese, no more than 12 digits, please use a combination of numbers and letters, do not support 5G WiFi signal, please use 2.4G WiFi signal.
2)Some software conflicts in the mobile phone will also cause the network connection to fail. Please restart the mobile phone, close the non-system software that starts automatically when you turn it on, turn on the mobile phone's Bluetooth and positioning, and then try to reconnect.

Q: The feeder is inaccurate or unable to feed
A: Please check whether there is too much food on the food tray and whether the food outlet is blocked; usually clean the food outlet and food channel in time; when using battery power, please check whether the battery is dead and whether the battery is leaking.

Q: The feeder displays offline
A :Please check whether the distance between the feeder and the router at home is more than 10 meters (effective distance is 10 meters); try not to partition the wall in the middle. According to the WiFi characteristics, the WiFi signal of the partition wall will drop sharply, and the connection will become unstable, which will cause the product to be offline.

Q: No response when turn on the feed
A: First check that the movie is plugged in and the switch is on. If they are all plugged in, please check whether the power adapter and power cord are damaged, and contact customer service for handling.

Hotspot distribution network (optional)
Please follow the button instructions to switch the network distribution mode to hot distribution network, the LED light flashes slowly, the specific operation steps are as follows:
1. Open the Smart Life APP, select Add Device - Manually Add - Small Appliances - Pet Feeder (Wi-Fi) - Enter the WiFi Password Next - Click "Next", select Slow Flash - Click "Connect" - then go to connect SmartLife -XXXX WiFi signal.
2. After connecting, return to the previous interface, and then enter the network configuration interface to wait for the connection.
