Package Contents:

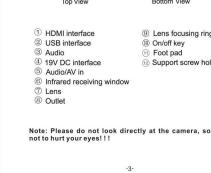

This product contains the following components, if there is any missing, please contact the dealer immediately.

Projector	1pcs	Remote control	1pcs
19VDC Adapter	1pc	Operating Manual	1pc

II. Product Introduction

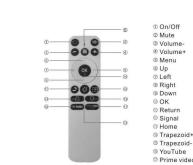

-2-

Note: Please do not look directly at the camera, so as not to hurt your eyes!!

III. Remote Control

Infrared Remote Controller

IV. Connection

Warning: As a safety precaution, disconnect the projector and all connected device before connecting the cables.

② Trapezoidal correction: When the projector is put up or down, the electronic trapezoidal correction function is needed to reduce the distortion.

(1) Manual trapezoidal correction: Move the cursor to Setting in the main interface and open Setting-Projection Setting-Horizontal/Vertical Correction. When the machine is projected up and down, the machine body startup key or the remote controller startup key, and then the red/blue light goes on. After the startup logo appears, it turns to the system interface and the machine starts to work.

② Image focusing/trapezoidal correction

(1) Image focusing: After the projector is turned on, the main interface appears. When the projected picture is not clear, adjust the lens focusing ring until the projected picture is clear.

(2) Four-point trapezoidal correction: Move the cursor to Setting in the main interface, and open Setting-Projection Setting-Four-corner trapezoidal correction. (This function is needed when the machine lifts up and down, left and right directions at the same time).

Four-point trapezoidal correction operation instructions: press OK to switch the four corners, and press the cursor up, left and right direction keys to switch the four corners after selecting, adjusting OK for one corner, press OK to switch to the next corner, repeat the above steps to adjust the four corners to be appropriate, and the picture is normal. (press Menu to result)

③ Projector signal source image selection

When the projector is connected with the external device interface, the projector needs to use the remote controller to move to the corresponding signal channel icon in the main interface, or press the signal selection key directly to switch the corresponding input channel for connection, such as HDMI, MEDIA, etc.

After the signal is turned on, the cursor on the remote controller can directly call to the corresponding signal channel, and the input signal source can be entered by pressing the signal selection key or directly use the remote controller to press the signal selection key to directly call the signal channel and select the HDMI channel to enter.

-3-

Press the confirm key to enter the corresponding channel. Exit the HDMI channel and press the return key to return to the main interface.

4. Projector connection setting

① Connect to an HDMI device

Press the On/Off to boot the projector, and enter the main interface after the boot logo appears for a few seconds.

② Connect to a USB device

③ Connect to a PC

④ Connect to a mobile phone

⑤ Connect to a projector

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
