

Product name: Wireless Charger

Model: JN-SE001

Wireless charging standard :Qi

Input: DC 4.2-12.5V

Output: DC 5V 1A, DC 9V 1.12A

Wireless charging Output:5W/10W

Charging frequency: 110 to 205KHz

Transmitted power: 10W

Charging efficiency: 80% (Max)

Charging distance: Within 8mm

Material: ABS&PC

Product size: 76*76*25mm

This product is a portable wireless charger, high capacity meet using high-performance batteries, compatible wireless charging and the cable straight twofold function, can give tablets, mobile phones, e-books, game consoles, digital camera, MP4, 't a MP5, PMP, PSP, etc with Qi wireless charging and USB charging charging infrastructure, use rise very convenient, Anytime, anywhere to solve the problem of no electricity facilities for you

Installation method

Matters needing attention:

1. Warning: failure to comply with safety instructions may cause fire, electric shock, damage to electric facilities, do not fall, disassemble, short circuit, placed in high temperature, water, in order to avoid danger. If there is expansion of the main engine or expansion of the charged facilities, please stop using it immediately
2. Please place the product out of reach of children to avoid accidents
3. Suggestion: The battery usage of this product is small. Please give the product sufficient battery before using it
4. If you do not use the product for a long time, charge the product at least once every three months
- 5, in order to make the product longer service life, do not completely discharge the power in the power supply before charging
6. It is forbidden to disassemble, hit or put the product into fire or water
7. The product shall not be modified without authorization
8. Stop using the battery immediately if it is found to bulge, leak or smell
- 9, pay attention to moisture and waterproof

Note: Before charging the mobile device, please check whether the connection wire and adapter are normal. If the mobile device cannot be charged, it may be improperly used in the process of the device, resulting in the built-in IC startup short-circuit protection function of the product. Please charge the host and remove the IC protection to enable normal operation

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
