JARNEX

Affix the camera to the wall using hanging strip and conveniently adjust the angle and orientation by hand.

Similarly, Stick the camera to the ceiling using command strip and easily adjust the angle and orientation by hand.

Installation Steps

When determining the ideal camera placement, adjust its height as needed within the maximum 9 ft range from the adapter. Conceal the cable management box for convenient access and use the compact Type-C side for tidy cable organization, ensuring an organized setup.

-5-

JARNEX

Locate a nearby outlet close to your camera's position, peel off the plastic cover from the adhesive tape, and affix it to a solid surface like a wall for efficient cable management.

Remove the plastic cover from the adhesive tape, place the camera on the ideal spot on the wall or ceiling, wait a few seconds for it to set, and then conveniently adjust the angle and orientation by hand, considering the cable's maximum range of 9 ft.

Reminders

Avoid installing the camera in areas where the privacy of others may be compromised.
Use only the provided power adapter to avoid damage to the camera or risk of electrical shock.
Do not install the camera in outdoor locations, as exposure to outdoor elements may lead to damage and reduced functionality.
Visit our website at www.jarnex.com for additional information and resources.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20 cm the radiator your body. This device and its antenna(s) must not be colocated or operation in conjunction with any other antenna or transmitter.
