<p><b>Wi-Fi Outdoor Camera</b> <b>Easy Guide</b></p>  <p>Monitor your home at anywhere, anytime.</p>	<p><b>1. Known of the camera</b></p> <p><b>Product description</b></p>  <p><b>Package contents</b></p> 	<p><b>2. Setup the camera</b></p> <p><b>[1] Charging</b></p>  <p>1) Use the 5V/1A adapter and Type-C USB cable to charge the battery. 2) The charging indicator turns to 'Green' while in charging. 3) When the camera is fully charged, the indicator turns off automatically. 4) It takes approximately 10 hours for fully charged. 5) If it continues to rain and cloudy for a month, please charge the camera via DC power to keep it running.</p> <p><b>[2] Micro SD card</b></p>  <p>For motion detection recordings 1) Class 10 or higher (4-128GB) micro SD cards are recommended for better video storage. 2) If you need to connect the camera with a new user account or changing network, please reset the camera after removing it from the app. 3) Normally a 16GB memory card can save the events approximately 1 month. 4) The camera makes loop recording, when the memory card is full, the old events will be covered by new ones automatically. 5) The events saved in MP4 format and you can playback on PC easily.</p> <p><b>*Reset the camera</b></p>	<p><b>3. Get the app</b></p> <p><b>Get the 'UBOX' app</b></p>  <p>Scan the QR code or search for 'UBOX' from Google Play or App Store.</p>  <p>Operate system of smartphone is required for normal use. iOS: 10.0 and up Android: 10.0 and up Always get the latest app from stores.</p>	<p><b>8. App features</b></p>  <p><b>9. Camera settings and PIR motion detection</b></p>  <p><b>10. Playback the events</b></p> 	<p><b>11. Video Resolution	HD 1920*1080 SD 640*360																														
Motion Detection	PIR Motion Detection, max. distance: 10 meters																														
Night Vision System	max. distance: 10 meters; Both IR night vision and color night vision available																														
Wi-Fi	2.4GHz																														
Camera Lens	F=2.8, Horizontal FOV 120°																														
Battery	2*2700 (960mAh) rechargeable lithium battery & 3W solar panel																														
Battery Life	The 9600mAh battery support up to 60 days with cloudy and rainy weather																														
Charging Method&Time	1) Solar panel charging; 2) Charging via Type-C USB cable and 5V/1A adapter for 10 hours																														
Weatherproof	IP67																														
Product Size	173 X 138 X 76mm L W H																														
Product Weight	457g (Camera weight)																														
Operate Environment	Temperature: -30°C ~ +60°C Humidity: <80%RH																														
Others	Buttons: Power on/off, Reset Indicator: Working (Blue/Red), Charging (Green) Storage: Micro SD card (4GB-64GB) for local storage APP: Ubox (iOS & Android) System Requirement: iOS 10.0 and up, Android 5.0 and up																														
<p><b>4. Powering camera and connection the camera to app</b></p> <p><b>Switch the camera power button to 'ON'.</b></p>  <p><b>Mounting the camera to the wall via the wall mount</b></p>  <p><b>Open the app, Add a device' then follow the below steps to connect the camera:</b></p> 	<p><b>5. Mounting the Camera</b></p> <p><b>Mounting the camera to the wall via the wall mount</b></p>  <p><b>Fully charge the camera until the green charging indicator turns off when using at first time.</b></p> <p><b>Blue indicator blinking - Searching network</b> <b>Red Working Indicator</b></p> <p><b>Make sure the solar panel is facing a sunny place and without shielding.</b></p> <p><b>Check if the Wi-Fi signal is strong (3 bars and above) before mounting.</b></p> <p><b>Make sure the camera lens and PIR sensor without shielding.</b></p>	<p><b>6. Recommended app settings</b></p> <p><b>You can make the desired general settings of the app in the section of 'Me' as following shown:</b></p> 	<p><b>7. Camera settings</b></p> <p><b>Share the device to family members or friends</b></p> 	<p><b>12. Warning</b></p> <p><b>1) After adding the device, why the phone and the device turn on the intercom with a harsh noise?</b></p> <p>Answer: This is because the sound of the device and the MIC of the phone are self-excited, which is like singing in KTV, and there's a similar self-excitation in the MIC and the speakers. When meeting this situation, just take mobile phone away. This product is a remote monitoring intelligent device, so the remote control will not have this problem.</p> <p><b>2) Why my android phone can't receive the notification?</b></p> <p>Answer: For Android phones, because the features of the system, the notification is blocked by the system when it receives a notification, and the push is displayed with the following permission: [a] In APP, Me - common settings - notification settings - Auto run: Open APP [b] In APP, Me - common settings - notification settings - ignore battery optimization: Low sensitivity or shutdown in complex environments. [c] Battery life is typically calculated by watching 20 hours a day. Frequent or prolonged viewing of the device can also lead to battery consumption. [d] In the process of installing the device, the user needs to restart and maintain normal communication with the server. The environment of network instability is related to the number of system wake-up, and the networks which is highly unstable can also lead to faster battery power consumption.</p> <p><b>3) What is the function of cloud storage?</b></p> <p>Answer: This product uses a free trial of cloud storage. When the device has an event alarm (PIR triggered event or motion detection event), the device will upload the video to the cloud. If no SD card or device is taken away, the key video remains in the cloud. After the probation period, users can buy cloud storage services, and paid users can view the last 30 days of cloud storage video.</p> <p><b>4) Will this product be attacked or compromised?</b></p> <p>Answer: This product uses triple security authentication, anti-counterfeiting identity, end-to-end data encryption, anti-stealing, and the network side also cannot read equipment and user data. The device end adopts the strictest firewall and security audit strategy, and the third-party cloud sharing end also adopts the strictest security audit strategy. The UboxDOS attack is also protected. Therefore, please feel free to use. This product will neither disclose privacy nor be mobilized by malicious code as a 'Trojan' attack on other Internet devices.</p> <p><b>5) How often do I need to change the solar panel?</b></p> <p>Answer: Solar panel typically designed by solar cameras can support a continuous month of wet weather when the sun can shine. If it's rainy for more than a month or frequently wakes up the device, it should take it off and use the USB power to recharge it. When USB charging or solar charging, the battery status can be seen in the app preview interface.</p> <p><b>6) Why did the PIR receive the alarm push, and no one in the screen appeared?</b></p> <p>Answer: Set the device PIR to high sensitivity to capture the video in 1 second. If a person leaves quickly within 1 second or the PIR is disturbed, there may be an alarm that no one appears. Different PIR sensitivity trigger different time, and the following is the description of PIR sensitivity and response time: Disabled: Close the PIR function. Low: The device will start to take videos and send an alert to the mobile device 7 seconds after the motion detection occurs. Medium: The device will start to take videos and send an alert to the mobile device 5 seconds from the moment it detects a moving object. High: The device will start to take videos and send an alert to the mobile device 1 second from the moment it detects a moving object. It is recommended to set the PIR detection at 'Disabled' or 'Low' to save battery power.</p> <p><b>7) Why is normal for some mobile phones when watching the SD video are ok, but is seriously delayed when watching the HD video?</b></p> <p>Answer: If the SD video is real-time, the HD video delay is caused by the lack of video decoding ability. Some Android phones or older versions of apple's phones, such as the iPhone 5, if the HD video decoding ability is insufficient, it will lead to the decoding speed too slow, which looks like a video delay.</p>	<p><b>13. FAQ and support</b></p> <p><b>1) After adding the device, why the phone and the device turn on the intercom with a harsh noise?</b></p> <p>Answer: This is because the sound of the device and the MIC of the phone are self-excited, which is like singing in KTV, and there's a similar self-excitation in the MIC and the speakers. When meeting this situation, just take mobile phone away. This product is a remote monitoring intelligent device, so the remote control will not have this problem.</p> <p><b>2) Why my android phone can't receive the notification?</b></p> <p>Answer: For Android phones, because the features of the system, the notification is blocked by the system when it receives a notification, and the push is displayed with the following permission: [a] In APP, Me - common settings - notification settings - Auto run: Open APP [b] In APP, Me - common settings - notification settings - ignore battery optimization: Low sensitivity or shutdown in complex environments. [c] Battery life is typically calculated by watching 20 hours a day. Frequent or prolonged viewing of the device can also lead to battery consumption. [d] In the process of installing the device, the user needs to restart and maintain normal communication with the server. The environment of network instability is related to the number of system wake-up, and the networks which is highly unstable can also lead to faster battery power consumption.</p> <p><b>3) What is the function of cloud storage?</b></p> <p>Answer: This product uses a free trial of cloud storage. Read me before use, keep manual and all relevant information for future reference.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

## **FCC Radiation Exposure Statement:**

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
