

Diagram of the Echo Show 5 (1st Gen) with labels for its features:

- Echo
- mute
- power
- RGB light
- for voice output
- for voice monitor
- TYPE-C
- indicator for pair
- indicator for voice monitor
- indicator for charging
- indicator for mute
- indicator for voice output

The diagram illustrates three different connection scenarios for the receiver:

- Sound Card:** A transmitter is connected to a sound card. The receiver is connected to a portable audio player.
- Camera:** A transmitter is connected to a camera. The receiver is connected to a portable audio player.
- Computer:** A transmitter is connected to a computer. The receiver is connected to a portable audio player.

Directivity	2.4G wireless Omnidirectional
sensitivity	-45db
Signal to noise ratio	<75db
frequency response	20HZ-20KHz
sampling rate	48K 24BIT
Interface Type	TYPE-C/3.5MM
Microphone	Built-in/support external
Li-battery	400MHA

Diagram illustrating the back of the device with various ports and buttons labeled:

- RGBライト (RGB Light)
- 内蔵マイク (Built-in Microphone)
- 電源オン (Power On)
- 外部マイク (External Microphone)
- イヤホン (Earphone)
- TYPE-C
- 対の指標 (Opposite Indicator)
- イヤホンの指標 (Earphone Indicator)
- ミュートの指標 (Mute Indicator)
- マイクの指標 (Microphone Indicator)

Diagram of the back of the device showing various ports and buttons:

- エコー (Echo)
- ミュート (Mute)
- 電源オフ (Power Off)
- RGB ライト (RGB Light)
- 声を出す (Speak)
- イヤホン (Earphone)
- TYPE-C
- 対の指標 (Opposite Indicator)
- イヤホンの指標 (Earphone Indicator)
- 充電の指標 (Charging Indicator)
- ミュートの指標 (Mute Indicator)
- 声を出すの指標 (Speak Indicator)

(受信機)

The diagram illustrates three connection methods for the Receiver:

- サウンドカード (Sound Card):** A sound card interface is connected to the Receiver via a red cable. The Receiver is then connected to a portable receiver device.
- カメラ (Camera):** A camera is connected to the Receiver via a red cable. The Receiver is then connected to a portable receiver device.
- コンピュータ (Computer):** A computer is connected to the Receiver via a red cable. The Receiver is then connected to a portable receiver device.

指向性	2.4 GHz の無線無指向性ワイヤレス
感度	-45db
信号対雑音比	>75db
周波数応答	20Hz~20KHz
サンプリング率	48K 24BIT
インターフェース	TYPE-C/3.5MM
マイク	内蔵/サポート
リチウム電池	4000mAh

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
