

► Product Specification

Maximum Power	12W
Input Power	DC 10V 2.4A
USB Charging	5V 2A
Wireless Charging Power	10W
Color Index	Ra > 90
Color Temperature	2700K-6500K
Light Source	88 PCS SMD2835
Luminous Flux	600Lm

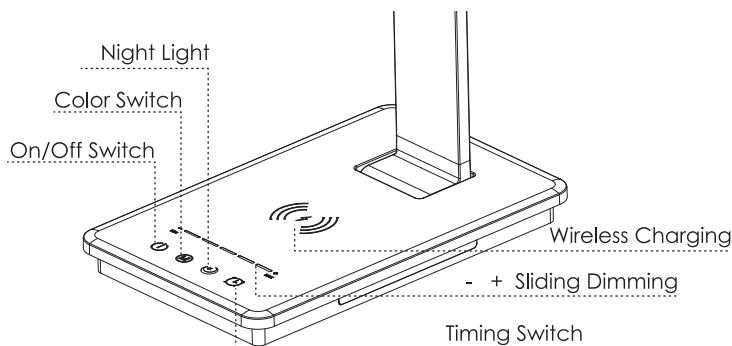

► Important Safety Information

- Place the device on a stable, level, and non-slipper surface.
- Do not use the lamp with a damaged power cord or plug.
- Do not let the device in wet or damp conditions, keeping away from water sources.
- Do not look directly at the light source to avoid eye irritation.
- Do not disassemble the product in case of an electrical shock(LEDs light can not be replaced).
- Do not use a power supply that exceeds the rated voltage range. Long-term use beyond the rated voltage range may damage the lamp.
- If you do not use the lamp for long periods of time, please disconnect it from the outlet.

- Green Light Flashing: 30 minutes
- Blue Light Flashing: 1 hours
- The light source will auto turn off after the timing mode you choose(night light can not be timed).

FCC Requirement

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled

environment. This equipment should be installed and operated with a minimum distance of 20cm

between the radiator & your body. This transmitter must not be co-located or operating in

conjunction with any other antenna or transmitter.
