Automatic Cat Litter Box Pro

QUICK GUIDE

Products

Getting Started

! Make sure that the top cover and waste bin are properly installed in place before plugging into an outlet.

Locate the litter box indoors on a firm, level surface with little space around. Do not touch any walls.

Tear off the tapes at the back of the litter mat. Place the mat in front of the litter box.

Slide out the waste bin from either side. Take out all accessories inside.

Remove the fix frame. Spread a litter box liner evenly inside and smooth out all edges.

Open the deodorizer and place it into the deodorizer holder. Insert the frame back.

Slide the waste bin back in place. You will hear one beep once the waste bin is properly installed (if already connected to power).

Plug in. The drum will rotate a full circle automatically. Wait for it to return to Home position.

Add clumping litter up to the MAX line. Wait for the drum to automatically spread the litter flat.

To help your cat transition to the new litter box:

Location is Key. Place the litter box in the same location as the old one, or leave the old one nearby for a short period of time (at least during transition).

Keep the Old Box. Do not throw out the old box. Put the new one in its designated spot and stop cleaning out the old one.

Use Recognizable Scents. Add a scoop of litter from the old litter box to provide a familiar scent for your

Control Functions

Wi-Fi

- Make sure that your smart device is connected to a secure 2.4GHz network and Bluetooth is enabled. Allow access to your Location during connection. Make sure that the drum is at the Home position before connecting.
- You can use the litterbox with control button only or download APP for more customizable options.
- The litterbox can only be linked to one account. You can hold the button for 10s to pair it with another device, or share with your family members on APP.
- For connection failure, refer to the Troubleshooting section of the User Manual.

App Introduction

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
