Working temperature	-20-60
Remote control	None
WIFI	Optional
Dock charger	None
PTT function	None
External camera	None
Log function	Support
Standard accessories	USB cable, Pocket Clip, Rope, Mini Tripod, User manual

Part 6 Operation Guide

Operation Guide 1

Charging

This camera has a built-in rechargeable lithium battery. When you use it for the first time, please charge it as follows:

1. Use a USB cable or connect to a computer to charge.
2. The camera can work while charging.
3. The red light is on when charging, and the indicator will turn green when it is fully charged for about 3-4 hours.

Operation Guide 2

Turn on

Short press the power button and wait for three seconds for the screen to display, the green light turns to be solid on, camera enters to standby mode.

Record videos

Short press Video button once to start video recording, green LED will flash slowly.

Short press Video button again to stop video recording, green LED will stop flashing and get back to solid on.

Recorded videos will be saved in splits automatically.

In loop recording mode, user can select video split length.

Take photos

In standby mode, short press photo button once to take a photo, the green LED will flash once.

WiFi

In standby mode, long press WiFi button for 3 seconds, green LED flashes, WiFi signal will show on display.

Mobile phone can connect to camera via the APP. Long press WiFi button for 3 seconds again to turn off WiFi, the WiFi signal on display will disappear.

WiFi name: D1-*****

WiFi password: 12345678

Red-Blue flashing lights

In standby mode, short press WiFi button once to turn on Red-Blue flashing lights, short press again to turn off the Red-Blue lights. (This function is for alarm reminder or lights signal during work.)

Night vision mode

In standby mode, Long press Photo button for 3 seconds to turn on infrared night vision mode, long press Photo button 3 seconds again to turn off the infrared night vision mode.

Stealth mode

In video recording mode, long press video button for 3 seconds to enter stealth mode, LED indicator will be off, long press for 3 seconds again to get back to normal video recording mode with flashing green LED.

Reset

In standby state, short press reset button to restart camera, settings will remain.

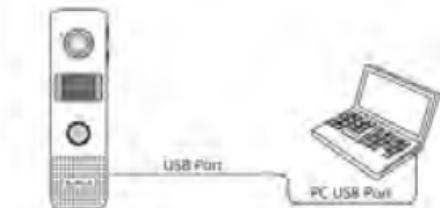

Operation Guide 3

Connect to computer

After powered on, connect the camera to the computer with USB cable, then copy the files from camera to the PC for playing.

The connection between the camera and PC is drive free in various operating system such as Win 7/in8/in10,please be sure that the USB cable is connected with the rear USB connector of the PC (as front USB connector may be insufficient in power supply).

Click to enter, the video files are saved in the Movie folder, and the photos are saved in the Photo folder.(If not, click on the DCIM folder).

Attentions:

Please copy important data to the hard disk of PC in time for permanent storage.

If video and sound are out of sync, please install professional video player to play the video, like VLC media player.

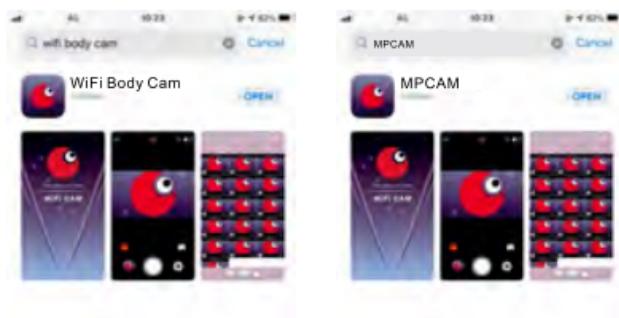

If there is no portable disk showing in the PC, please try again with another USB connector or cable.

After connected successfully the screen will display “”, otherwise, the connection unsuccessful.

Part 7 WIFI Network

Search apk named “WIFI Body Cam” on Apple store (IOS phone).

Search apk named “MPCAM” on Google Play (Android phone). Then download and install

APK name:WIFI Body Cam
For IOS Phone

APK name:MPCAM
For Android phone

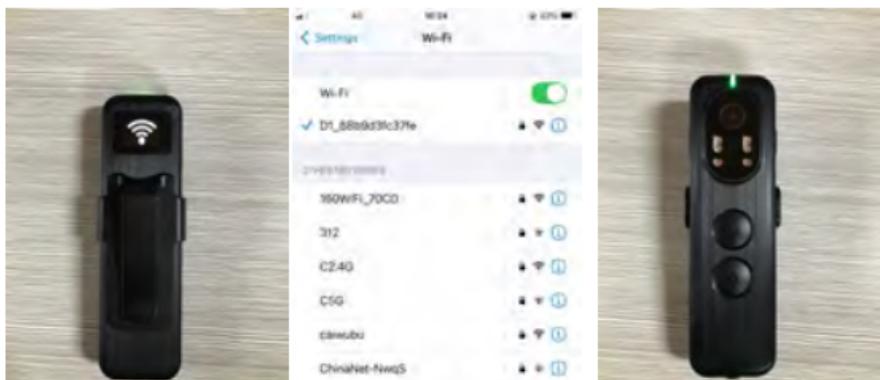

2. Turn on the camera WIFI, enter mobile phone's the WIFI settings to find WIFI "D1-*****" and connect it. Initial password: **12345678**.

If the connection is failed with a message : No Internet Connection.

The device may already be connected to other devices , please disconnect first.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
