This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this device not expressly approved by the manufacturer for compliance could void the user's authority to operate the equipment.

Notice: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential environment. and can provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. If this equipment causes harmful interference to radio communications, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Reorient or relocate the equipment causing the interference.
- Use higher power or a higher grade of coaxial cable.
- Connect the equipment into a circuit different from that to which the receiver is connected.

This device and its antenna(s) must not be located or operated in conjunction with any other antenna or transmitters.

Caution: The equipment must be used in accordance with general RF exposure requirement in portable exposure condition without restriction.
