Why can't take a hot bath with the smart bracelet?</p> <p>Answer: the water has a relatively high temperature, it generates a lot of vapor which is in the gas phase with small molecular radius and can easily infiltrate into the smart bracelet through the gap. When the temperature drops, the vapor will condense into liquid droplets which will easily cause the short circuit inside the smart bracelet and damage the circuit board and damage the smart bracelet.</p> <p>2. Why is the Bluetooth connection failing all the time?</p> <p>Answer: User may encounter this problem. It may be prompted that the paired message is not received. If the APP is not connected with bracelet. Launch APP to connect the bracelet, and the Bluetooth icon can be displayed normally. Note: For more frequently questions, please refer to the YouPro APP User Manual.</p> <p><b>Warning:</b></p> <p>Please consult your doctor before you take a hot bath. The smart bracelet should not be used for medical purpose through it may dynamically monitor the heart rate and time.</p>
