Introduction

Smart APP control air purifier, with PM2.5 air quality sensor and UV sterilizer, it can clean the dust, pet dander, smoke, mold, and pollen in the air, and protect your family and pets. Moreover, the convenient features of filter replacement reminder, timer setting, and night light functions provide you a daily quality service and decor your room.

Features:

1. Smart APP Control

This air purifier can be linked with Tuya Smart APP, you can control all the functions in your phone.

2. Air Quality Sensor & Air Quality Index LED Display

The inserted sensor detects PM 2.5 intelligently with 3 air quality indicators and automatically adjust fan speed to optimize room air quality. You can always see the air quality at your home.

3. The Efficient UV Sterilizer

The UV-C light helps to kill airborne virus and bacteria.

4. Five Working Modes

This device has built-in fan and motor to provide cool air, with 3 fan speeds, sleeping mode, and auto mode with indicator lights.

5. Three Brightness Night Light

Warm light creates peaceful night atmosphere with adjustable brightness under L/M/H levels.

6. Timer Function

1-12 hours timer selection allows you to set the time of turn off freely.

7. True HEPA filter for Efficient Purifying

This unit has H13 filter with nylon pre-filter and active carbon filter for more efficient air purifying effect.

8. Filter Replacement Reminder

Convenient filter replacement indicator light saves the trouble to monitor the filter lifespan.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
