

Quick Installation Guide

1 Hardware installation

There are two ways to install the network card ;
Note: The picture is a simplified schematic diagram, please refer to the actual product for details.

(1) Insert the network card directly into the USB port of the computer;

(2) Connect the computer USB port through the USB extension cord base (USB extension base needs to be purchased separately);

Note: When using a desktop computer, it is recommended to use a USB extension cord base to connect to the port on the back of the computer case (some desktop ports have insufficient power supply or cannot be used), and extend it to the Desktop computer usb ports.

2 Driver Installation

2-1 The software installation process under each Windows 10/11 system is similar. The following installation takes Windows 10 system as an example. Insert the network card into the USB3.0 port, and choose to run "Setup.exe" in my computer.

2-2 Open the program and follow the prompts to install the driver.

2-3 After the installation is complete, it is recommended to restart the computer. If there is work in progress or documents being written, you can restart it later. If there is nothing else, it is recommended to restart immediately.

3 Network connection settings

3-1. After confirming that the driver is installed correctly, you can double-click the wireless network card icon in the lower right corner, and click the icon with the left mouse button. The computer will display the connectable wireless

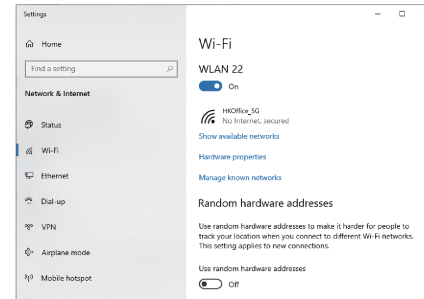

3-2. Click the wireless network you want to connect to and enter the password to connect.

4 Network connection status

4-1. After the network is connected, the computer system icon will change to , and then you can right-click the icon and select "Open "Network and Internet" settings" to enter the setting selection interface.

Warning:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

The device has been evaluated to meet general RF exposure requirement.
