What time to begin charging

If the Battery indicator will begin slowly flickering, that means the keyboard go into the low-voltage status, please connect the charging cable for Charging. (Charing voltage: DC5V/1A(MAX))

Shortcut Keys Instruction

ENVIRONMENT PROTECTION

Disposal of old electric devices.

The European directive 2012/19/EU for waste electrical and electronic equipment (WEEE) states that used household devices should not be disposed of with unsorted community waste. These used devices must be collected separately from household waste in order to increase the percentage of recovered devices and to recycle their parts, with the goal of reducing the negative effects on human health and on the environment. The symbol of the crossed out garbage can will be stamped onto all devices as a reminder of the obligation to put them in a separate garbage collection. The consumer must consult local authorities or the vendor to inform themselves about the manner in which their device should be disposed of.

Dispose of the packaging materials in an appropriate way. Contact your local authorities about collection points or waste separation.

Please dispose of batteries in an environmentally friendly manner. Do not put batteries into the household waste. Please use the return and collection systems in your community or contact the dealer where you purchased the product.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
