MADE IN CHINA

Introduction

Thanks for choosing our product.

This product is a smart wireless microphone that provides professional-grade recording output. Plug and play, no app required. Multiple uses: It can be used in online live broadcast, video Vlog shooting, program interview, recording, video teaching and other occasions.

The wireless microphone consists of two parts, one is microphone transmitter, the other one is Lightning / Type-C receiver. (See as below picture)

ID Diagram

- ① Microphone pickup hole
- ② Power touch key
- ③ Microphone indicator
- ④ Type-C charging port of microphone
- ⑤ Monitor earphone port
- ⑥ Charging port of receiver for phone
- ⑦ Receiver indicator
- ⑧ Rope hole
- ⑨ Lightning / Type-C port to connect phone
- ⑩ Microphone clip
- ⑪ Signal hole, no indicator

Note: For the use of ⑥, there is no battery in Lightning / Type-C receiver, and no need to charge during live. If the phone is in low battery during live, it can be charged directly through ⑥ with a lightning / Type-C cable.

Specification

Model Number: M3-WmicroA / M3-WmicroT

Working Frequency: 2.4GHz

Mic Charging Port: Type-C

Charging Input Standard: DC 5.0V

Mic Battery Capacity: 3.7V / 120mAh

Charging Time: 1-1.5H

Recording Time: 8H

Disconnect Wait Time: 300s

Sleep Standby Time: 120 days

Recording Frequency: 50-15KHz

Control Method: Touch

Packing List

- 1 x Microphone transmitter
- 1 x Lightning / Type-C receiver
- 1 x Type-C charging cable
- 1 x Monitor earphone
- 1 x User manual
- 1 x Carrying case

About UI

Microphone Transmitter

Function	How to use	Light

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
