SettingSmartLifeApp

Step1:

Method1, Scan the below QR code and install the SmartLife App.

Method2, Search for "SmartLife" to download in App Store or Google Play and install it for iOS/Android.

Tips: This App is compatible with mobile devices iOS 8.0 and above and Android 4.0 and above.

Step2:

Launch the "SmartLife" App, the App will ask you to register your device.

Enter your phone number or email and select the country you live in

Step3:

After inputting phone number, you will receive a text with a registration code. And if you choose email you will be asked to create a password.

Input the registration code you received or create password if email method chosen.

Tips:

Fast register through other communication Apps which show on the bottom of the homepage of "Smart Light" App, such as Facebook, Wechat. It is recommended to register by email or mobile number if you need to use Amazon Alexa and Google Home for voice control.

QuickmodeConfiguration(Recommend)

1.Before reconnecting,please makesure your smartphone or device is connecting with your home Wi-Fi successfully.

2.To connect in quick mode configuration, the light needs to be set to flash rapidly. (You can learn the detailed instruction on "How To Make Light Blinks Rapidly" from inner page of "SmartLife" App)

3.Open App and click "+" to add device.

4.Follow the in-App instruction to connect the smart device to your Wi-Fi network [2.4GHz].

5.Once connected, the App will prompt the connection.

6.Now you can control the smart device through "SmartLife" App.

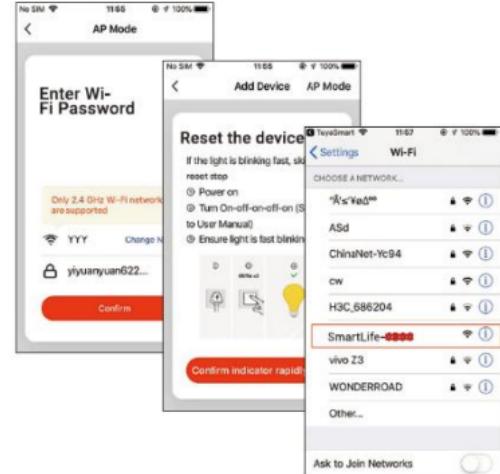

APmodeConfiguration

1.Before connecting, please make sure your smart phone or device is connecting with your home Wi-Fi [2.4GHz].

2. Make sure AP mode configuration is initiated: power on the light and confirm that light blinks slowly. (How to make light slowly blink, please check the inner App instruction)

3. Select device type and click AP mode to Add device.

4. Go to Wi-Fi setting in your smart phone and select the "SmartLife-xxx" for your Wi-Fi.

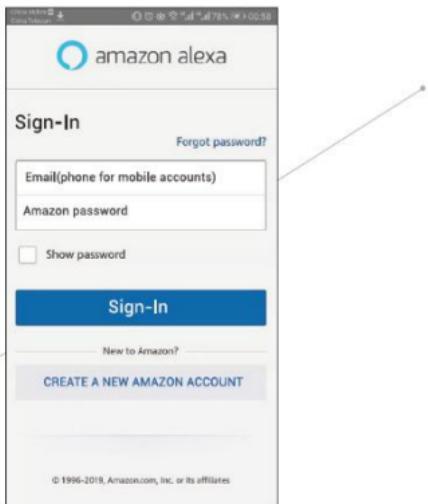

4. Once connected successfully, the App will prompt the connection, and click "Done".

5. Now you can control the smart device through "SmartLife" App.

How to connect smart device to Alexa/Google Home

Before you start, make sure that

Your smart device is connected with WIFI and can be controlled by App. You have an Alexa-enabled device (Echo, Echo dot, etc.), or a device enabled with Google Assistant (Google Home, etc.). The Alexa App or the Google Home App which is already installed on your smartphone and you have created an account.

To control your device with Amazon Alexa:

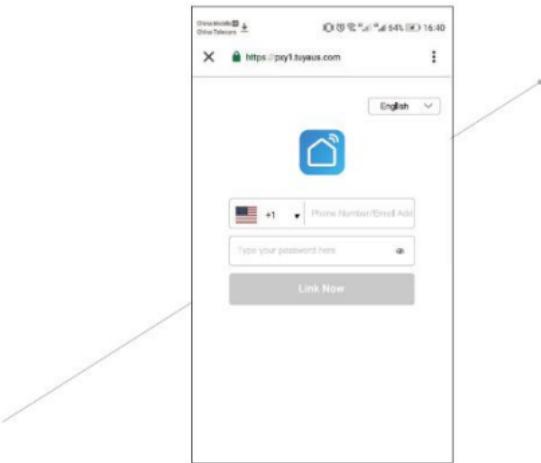

I. Open the Alexa App and select "Skills" from the menu in the top left corner of the homepage.

3. Enable it in Alexa APP.

4. Login with your "SmartLife" account to authorize Alexa to access to your account.

5. Discover new smart devices via the "Smart Home" menu in the Alexa App or Alexa voice control. Now you can control your Smart device through Alexa

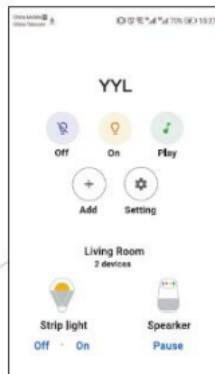

After your smart device is connected with Alexa successfully, you can simply ask Alexa to set your device like this

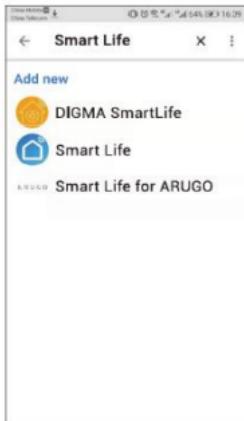

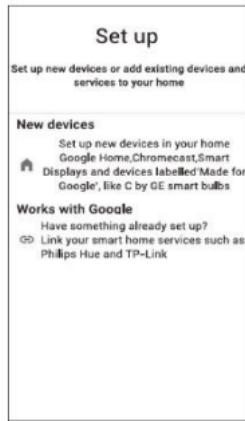

- Alexa, turn on <device name>
- Alexa, turn off <device name>
- Alexa, set <device name> to percent
- Alexa, brighten/increase <device name>
- Alexa, dim/decrease <device name>
- Alexa, set <device name> to (color)
- Alexa, set <device name> to (color temperature)
- Alexa, make/set <device name> warmer
- Alexa, make/set <device name> cooler

To control your devices with Google Home:

1. Open the Google Home App, tap the "+" icon in the homepage, then select "Setup device" in the "Add and manage" page

2. In the "Set up" page, tap "New devices" to set up new devices in your home, like your Google Home speaker and smart lighting products. Tap "Work with Google" to authorize the Google Home with your "SmartLife" account.

4 .After successful configuration, say simple commands to Google Home to control the light with your voice like this:

- OkGoogle,turnon<devicename>
- OkGoogle,turnoff<devicename>
- OkGoogle,is < devicename>on/off?
- OkGoogle,set<devicename>topercent
- OkGoogle,brighten/increase<devicename>
- OkGoogle,dim/decrease<devicename>
- OkGoogle,Dim/Brighten<lightname>by 50%
- OkGoogle,set<devicename>to(color)
- OkGoogle,set<device name>to(colortemperature)
- OkGoogle,turnon/offlightsin<roomname>
- OkGoogle,Turn on/off all of the lights
- OkGoogle,Start<scenename>
- OkGoogle,Activate<scenename>

WarmTips

- Please check whether the device is connected with power and your phone is connected with Wi-Fi.
- Check routers: If the router is dual-band router, please select a2.4GHz network to add device. You also need to open the router broadcasting function
- Set up the wireless router: Set encryption method as WPA2-PSK authorization type as AES, or set both as auto. The Wireless mode can not be only 5GHz
- Please name router Wi-Fi in English. In order to stay strong Wi-Fi signal. Please keep device and router within a certain distance.
- Check whether connected devices have reached the maximum number of router connection. If so, please try to turn off the Wi-Fi connection of some devices.
- If the router uses DHCP service, ensure that the assigned IP address is greater than the number of devices before connecting the device.
- Make sure the router wireless MAC filtering function is enabled
- Remove the device from the filter list and make sure that the router is not prohibiting the device from connection.
- Make sure the entered password is correct when adding a new device
- The instructions in this manual are for your reference only. The app will be updated from time to time. Always follow the instructions in the app to complete Wi-Fi setup and know more about the functions.
- Use proper commands when talking to Alexa/ Google Home, repeat your questions, speak clearly to Alexa/ Google Home in English.
- If you can not control the devices with Alexa/ Google voice control, check if you modified the name of devices in "Smart Life" App, if yes, you need to rediscover the devices through Alexa/ Google App

FCC Statement:

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - -- Reorient or relocate the receiving antenna.
 - -- Increase the separation between the equipment and receiver.
 - -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - -- Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

The distance between user and products should be no less than 20cm.
