

长80x70(折叠正反) MM

15W | 10W | 7.5W | 5W

Thank you for purchasing our products! Below is the product's information and use method, if you need more help, please contact us by the information at the end of the manual.

product's information

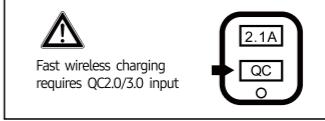

Item No. : C1 Working power : 5W/75W/10W/15W
Input power: 5V/3A ; 9V/2A (QC2.0/3.0) Charging Efficiency: ≥75%
Suitable for: Phones which support qi wireless charging

How to use it ?

1. First you have to put it into your car storage box or any where you like. Please make sure that the pad is flat and the position is safe for your phone and your driving.
2. Plus the usb connector to the fast car charger's usb port. Please do not connect it into the car's own usb port, it will not work well.
3. After the charging pad is connected to power, just put your qi charging phone on the pad. Please point to the charging area, it's very easy!

Note for use

Please do use a fast car charger or fast adapter to work with it, If the input power is under 9V/1.67A the pad will not work in fast charging mode. And do not get power from the car's own usb port.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
