Basic App Controls

- Once setup is complete, the App will load to your home screen where you control all of your devices. Select SG Light Bar from the menu to navigate to the controls.
- Press power on the bottom of the screen to turn the light on and off. Move the slider bar left and right to adjust the brightness of white light to your preference.
- Press Color to adjust the light color, saturation and color brightness settings.
- Press Scene Mode to select from one of 8 lighting preset modes and customized presets that you can set to your favorite colors.
- Select Music to have the light automatically move to the music.
- Select Timer from the bottom of the screen to automatically have light turn on/off as specific times.

Tip: Select the () menu on the top right of the control screen to change the device name, change advanced features and more.

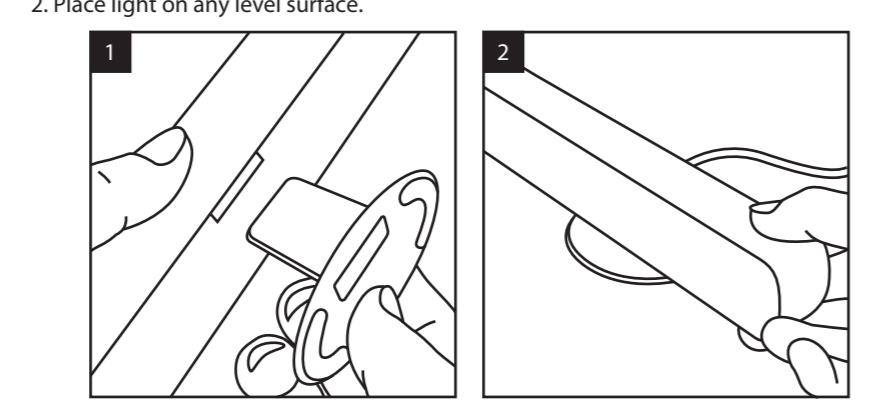

Timer
Timer controls a countdown of time to turn the light off. This function is perfect if you want the light to turn off after you have fallen asleep or left the house. To operate, follow the instructions below.

- Press the Timer button located at the bottom of the light control screen.
- Set the desired length you wish the light to be on. You can set the timer in 1 minute increments for up to 23 hours, 59 minutes in length.

Timer mode will only work when App is opened or running in the background on your device. Quitting the App will turn the light off and stop the timer function.

Stand Installation
1. The light has one mounting hole on the bottom and one mounting hole on the side for use in horizontal or vertical configurations. To install the stand simply press stand, the stand tab into one of the mounting holes on the flat end of the light with base facing forward.

2. Place light on any level surface.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
