

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a device, specifically the battery and the main board, laid out on a blue surface. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The battery is a white, rectangular, flexible unit on the left. The main board is a small, black, rectangular circuit board on the right, connected to the battery by red and black wires. The device's black plastic housing is visible in the background.
EUT Housing and Board View 2	 A photograph showing the internal components of a device, specifically the battery, the main board, and the device's housing, laid out on a blue surface. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The battery is a white, rectangular, flexible unit on the left. The main board is a small, black, rectangular circuit board in the center, connected to the battery by red and black wires. The device's black plastic housing is on the right, showing the internal structure and the connection points for the battery and board. The device's black strap is visible on the right side.

Solder Board-Component View 1	 A photograph of a blue printed circuit board (PCB) component, likely a SIM card reader or antenna module, placed on a blue textured surface. The component is rectangular with various electronic components, including a large silver square component and a smaller gold-colored component. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. A red wire is connected to the top of the component.
Solder Board-Component View 2	 A photograph of the same blue PCB component from a different angle, showing the underside. The component is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 0 to 100 mm. The underside of the component shows various electronic components, including a large silver square component and a smaller gold-colored component.

Solder Board-Component View 3	 A photograph of a blue printed circuit board (PCB) component, labeled '3', showing various electronic components including a large black integrated circuit (IC) in the center, a smaller IC to the left, and several surface-mount components. The board is placed on a blue textured surface. A black ruler with white markings is positioned below the board, showing measurements in millimeters (mm) from 0 to 100.
Solder Board-Component View 4	 A photograph of a blue printed circuit board (PCB) component, labeled '4', showing various electronic components including a large black integrated circuit (IC) in the center, a smaller IC to the left, and several surface-mount components. The board is placed on a blue textured surface. A black ruler with white markings is positioned below the board, showing measurements in millimeters (mm) from 0 to 100.
