The Remote Transmitter can be used to control up to 2 Receiving Collars. 9. 2 pairs of metal contacts (1 short and 1 long) are included to suit the length of your dog's hair. 10. The Transmitter with lock key function. How does the dog training collar work? The Rechargeable and Waterproof Training Collar has been proven to be a safe, comfortable, and effective training system for all dogs weighing over 6lbs. This system allows you to control your dog within a range up to 1000 feet. At the press of a button, the Remote Transmitter sends signal to the Receiving Collar and activates a Beep, a Vibration or a Static Shock correction output. By using the Training Collar properly, you can correct most of your dog's undesired behavior and teach basic and advanced obedience commands.	Important: the Training Collar has an effective range up to 1000 feet. Hold the Remote Transmitter horizontally away from your body to achieve the optimum range, Terrain features, weather, vegetation, transmission from other radio devices and other factors may affect the range of the Remote Transmitter. Precautions DO NOT use this product for aggressive dogs or vicious animals. Risk of skin damage. It's important to fit the collar properly. A collar that is fitted too tightly or worn for too long may harm your dog's skin. This condition, which ranges from redness to pressure ulcers, is commonly known as bed sores. CAUTION • Do not let your dog wear the collar for more than 12 hours per 24-hour period. • If possible, gently reposition the collar on your dog's neck every 1 or 2 hours. • Never attach a lead to the Receiver Collar, as this would cause excessive pressure on the contact points. • When using a separate collar to connect a leash, please ensure that it does not put excessive pressure on the electronic collar. • Examine your dog's neck daily for signs of chafing or soreness. • If a rash or sore is found, stop using the collar till the injured skin has been healed. • If the condition persists for more than 48 hours, consult your veterinarian. • If possible, please use the Beep Mode or Vibration Mode at first, then can try Static Shock function. Please ensure that you charge both the Receiving collar and the Remote Transmitter before using! To extend the battery life of this product, please charge them per month if you do not intend to use it for a long period of time.	Components How to change the contact point to the Receiver Collar
Key Definition 1. (Page 9)	Step 4 Testing the Rechargeable and Waterproof Training Collar: Testing the Static Shock Function The static impulse generated by the Receiving Collar cannot be seen by naked eyes. Test whether the Static Shock Function works by using the following procedure: • Remove the Test Light from the package and connect it to the contact points on the receiving collar. • Press the button on Remote Transmitter to launch Static Shock signal, if the Test Light flashes, the Static Shock Function work correctly • If the Test Light flashes, the Static Shock Function is working correctly. • The intensity of the Static Shock can be adjusted by pressing level Up/Down buttons (Up/Down) from level 1-9.

尺寸: 80*105mm

Testing the Vibration  Function

- Press the  button on Remote Transmitter to launch vibration signal, if the Receiving Collar vibrates, the Vibration function works correctly.
- The intensity of the vibration can be adjusted by pressing level Up/Down buttons ( ) from level 1-9.

Testing the Beep  Function

- Press the  button to send the signal. If the receivers beeps, it works correctly. The intensity of beep can be adjusted from 1-9 by pressing level Up/Down button.

Step 5 Fitting the Receiving Collar to your dog:

1. Center the Contact Points under your dog's neck(A).

2. The Receiving Collar should be positioned snugly around your dog's neck.
Important: Make sure that you can fit one finger between the strap and your dog's neck(B).

Note:

Choose the correct Contact Points to suit the length of your dog's hair. If your dog has long hair or a thick coat, use the longer Contact Points.

Frequently Asked Questions

Q1: How old does my dog have to be before I start using the Rechargeable and Waterproof Training Collar?

A: Your pet should be able to recognize basic commands such as "Sit" and "Stay!". The Rechargeable and Waterproof Training Collar may be too large for dogs weighing less than 15lbs.
The Receiving collar is adjustable in length from 9.5 to 26 inches. If your dog's neck is smaller than 26 inches, please cut the redundant part. This product is not suitable for dogs with necks larger than 26 inches.

Q2: Once my dog is trained and has learned to obey my commands, will he have to continue wearing the Receiving Collar?

A: Probably not, although you may need to reinforce the training with the Receiving Collar from time to time.

Q3: Is the Receiving Collar waterproof?

A: Yes. In fact, your dog can swim while wearing the Receiving Collar. Must seal well the charging port tightly, and keep it dry after get wet.

Q4: What is the lifespan of the lithium batteries?

A: The Lithium battery in the Remote Transmitter and the Receiving Collar can be charged for 400 times.

Q5: How long should the training session for my dog be?

A: The training sessions should be kept short for maximum effectiveness. It's advised not to train your dog for more than 10-15 mins at a time.

The Remote Transmitter does not work

- You must charge the Remote Transmitter before you use it for the first time. Charging time is typically 2.5 hours.
- Ensure that the Remote Transmitter has adequate power.
- Remote Transmitter will automatically go into Standby Mode if it is idle for 1 min. No LED light will be illuminated at this time. Press any button to re-activate the Remote Transmitter.

General Tips for Training Your Dog

- Eliminate one behavioral problem or teach one command at a time. If you move too fast with the training, your dog may become confused.
- Be consistent. Give your dog a single Beep, Vibration, or Static Shock for each misbehavior.
- Do not over-correct your dog. Use a few stimulations as possible during training.
- Unless you can supervise him/ her, it is recommended that you restrain your dog from environments in which he/ she has a history of misbehaving. However, setting up a training session in this case can dramatically improve your chances of success.
- If your dog reacts to the training by hiding or acting fearfully, redirect his/ her attention to a simple and appropriate behavior, such as the "Sit" command.

Common Sizes of Different Dog Breeds				
Size	Neck (cm)	Chest (cm)	Back Length (cm)	Type

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
