### Justification for Re-use of Radio Test Results

We, Cradlewise Inc., believe that the conducted signal test data on original reports provided by the Askey Computer Corp (WIFI+BT Combo Module, FCC ID: H8N-AP6275S approved on July 7, 2021) can be re-used for the following reasons:

1. Applicant has built in the radio module according to the specific radio module integration guides.
2. No changes have been made on radio module, only the WIFI+BT module antennas have been changed.
3. Re-test the conducted power for spot check verification, the radiated spurious emission and co-located emission, and re-evaluated the RF Exposure.

The logo is a circular blue stamp with the text "CRADLEWISE INC." repeated twice around a central star, with a small registered trademark symbol (®) next to the second "INC".
