◆ CHARGING

Earphones: Put the earbuds into the charging case,
the indicator lights are flashing and it will charge the
earbuds automatically after you close the charging case

Warm Reminders:

- 1.If the earbuds do not connect to each other when you
take the earbuds out of the charging case and you will
see the red LED light of two earbuds will flash slowly
- 2.After the earbuds is paired, the main earbud is flashing
quickly, but the secondary earbud doesn't flash
- 3.If the LED lights no flash, this means that both earbuds
have connected to your mobile device successfully
- 4.Put in or take the earbuds out of the charging case,
the LED light will flash, that means the earbuds have
connected to the charging case successfully and charging
has begun after you close the charging case

Charging Case: The charging case is connected to
the Type-C and yellow light will flash to indicate
charging has begun

Chipset introduction
Earphones type: TWS bluetooth earphones
Bluetooth chipset: 32-bit RISC CPU 6976D
Bluetooth protocol: a2dp \ avctp \ avdtp \ avrcp \ hfp
\ spp \ SMP \ att \ gap \ GATT \ rfcomm \ SDP \ I2cap
Bluetooth version: V5.0+EDR.BLE
Radio frequency power class: class2 and olyss3
Transmission distance: ≥10M
Charging port type: Type-C
Operating voltage: 3.7V
Charging current: charging box 200mAh, earphone 30mAh
Charging time: charging box ≤2 hours, earphone ≤1.5 hours
battery capacity: charging box 400mAh+ earphone 40mAh*2
Call duration: 4-5 hours, music playing duration: 5-6 hours,
Battery cycle life: charge and discharge cycles ≥400 times
standby duration: 60 hours

Microphone type: MEMS silicon wheat
Microphone: Dual mic (left/right)
Sensitivity:-38db ±3db (db = 1v/pa @ 1khz)
Sound output mode: backward sound
SNR:63dB
Distortion THD: less than 0.15%94db SPL@1khz
Impedance: 200Ω

Speaker type: Double composite membrane micro speaker
Drive:φ13mm, N45 Neodymium magnet
Sensitivity: 103db (±3db) @ 1khz.126mV
Impedance: 32Ω
Frequency response: 20hz-20KHz
Rated power: 3mW

Charging box size: 49*27*54mm
Earphone size: 20*18*36mm

Function introduction
K9 earphones support master & deputy earphones
switching freely, It means you could use each earphones
independently, Power off any one earphone of them won't
effect another earphone's usesing.
When one earphone battery low or you only want wear one
earphone, you could power off one earphone of them or put
it into charging box. Just pick up from the charging box, the
earphone can connect another earphone quickly once you
wanna use them together.

Indicator light introduction

Power on	Red light flashes slowly
Power off	Red light flashes 3 times
Pairing succeeded	The master earphone red indicator flash quickly and the deputy earphone indicator light is off.
connected device Successfully	Both L/R earphones red indicator are off.
Low battery	Red light flashes slowly
Left earphone charging	Left number on LED digital screen flash
Right earphone charging	Right number on LED digital screen flash
Charging box charging	The LED digital display screen numb flash

Whether Pairing succeeded	If Pairing failed, you will find 2 K9 pairing name in your device, you need put 2 earphones into charging box again, close the charging box flip cover, then open the charging box flip cover again wait for 5s, you will find only 1 K9 pairing name in your device now, Re-connect your device is ok.
Confirm if both earphone are turn on	If only one earphone can hear the sound, please check whether both earphone are power on normally. It possible that another earphone under low battery or power off status. Please recharge the earphone,then turn it on is ok. You could pick up the earphone from charging box power on automatically or long touch switch until earphone power on.

Confirm the charging box wheather have power	When the charging box under few battery or no battery situation, it can't recognized the earphone after you put the earphone into charging box, it caused the earphones still working.
Check the earphone charging point whether covered by other things.	If the earphones charging point covered by other things, it caused the charging box can't charging for the earphones, Please try remove it or use alcohol wipe to clean and try charging again..

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
