

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT (Electronic Unit) housing. The housing is open, revealing a green printed circuit board (PCB) with various electronic components. A black battery pack with two white coils is connected to the board. A black plastic cover is also visible. A ruler is placed below the components for scale.
Solder Board-Component View 1	 A photograph showing the soldered components on the PCB. The components include a black battery pack with two white coils, a small circular component, and a small rectangular component. A ruler is placed below the components for scale.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) with various electronic components. A circular white component with a black center is connected to the board via a yellow ribbon cable. Several colored wires (red, black, white) are soldered to the board. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows measurements from 0 to 100 mm.
Solder Board-Component View 3	 A photograph of the same green PCB from a different angle, showing more detail of the components and solder joints. The board is connected to the same circular white component and has the same colored wires. It is positioned next to a black ruler with white markings, showing measurements from 0 to 100 mm.

Solder Board-Component View 4	 A photograph showing a small green PCB component with a circular silver pad on its top surface. The component is connected to two thin wires (one red, one black) which are soldered to a larger black PCB. A black circular component is also visible on the black PCB. A black ruler with white markings is placed below the components for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 5	 A photograph showing the same green PCB component as in View 4, but from a different angle. The component is connected to two thin wires (one red, one black) which are soldered to a larger black PCB. A black circular component is also visible on the black PCB. A black ruler with white markings is placed below the components for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
