

Product parameters

Product name: Wireless charging module

Ttpe: SI1200

Input max: 12V/1.3A, 9V/1.6A

Output: 5W, 10W

Efficiency: input $\geq 82\%$

Effective charging distance : $\leq 8\text{mm}$

Compatible with Qi standard

Working temperature : $10^{\circ}\text{C} \sim +50^{\circ}\text{C}$

Storage temperature : $-20^{\circ}\text{C} \sim +60^{\circ}\text{C}$

Best charging position

Let the wireless receiver equipment with the Qi standard facing the wireless charger center position.

Operation guidelines

The wireless charger is placed smoothly, let the wireless receiver equipment with the Qi standard facing the wireless charger center position.

Attentions

- . Please use the product within the recommended temperature range
- . Please do not let the product slide, collide or squeeze hard
- . Please do not disassemble or refit the product arbitrarily.
- . Prevent contact with liquid, metal, dust or pencil powder and other conductive materials
- . Do not place magnetic stripe cards (identity cards, bank cards, phone cards, etc.) close to the product, wireless charging magnetic field may damage the magnetic stripe card.
- . Please do not give the product to children or animals to play, chew or swallow. Please disconnect the power supply when cleaning the product
- . Please do not put metal cell phone shell or other metal on the charger
- . When charging, ensure that there is no metal object between the wireless charger and mobile phone, so as not to damage the device

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
