

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

Solder Board-Component View 1	
Solder Board-Component View 2	

Solder Board-Component View 3	 A photograph of a small, rectangular electronic component (likely a USB-to-UART bridge) mounted on a blue textured surface. The component is positioned next to a black L-shaped ruler with white markings. The ruler indicates the component's dimensions are approximately 15 mm by 10 mm. The component has a USB-A connector on one side and a small integrated circuit in the center.
Solder Board-Component View 4	 A photograph of the same electronic component from a different angle (View 4). The component is shown next to the same black L-shaped ruler, confirming its size. This view shows the underside of the component, revealing the solder joints and the components on the reverse side of the PCB.

Solder Board-Component View 5	 A photograph of a small, square, black electronic component with a yellow solder pad on one side, positioned next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters. The component is placed on a blue textured surface.
Solder Board-Component View 6	 A photograph of the same small, square, black electronic component from a different angle, showing its top surface with several small solder pads. It is positioned next to the same black L-shaped ruler on a blue textured surface.

Solder Board-Component View 7	 A photograph of a small, square, black electronic component with two circular solder pads on its top surface. The component is placed on a blue textured surface next to a black L-shaped ruler. The ruler has white markings in millimeters and centimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 100 mm.
Solder Board-Component View 8	 A photograph of the same small, square, black electronic component from a different angle. This view shows the bottom surface of the component, which has several small, circular solder pads. The component is placed on the same blue textured surface next to the same black L-shaped ruler, with the horizontal scale ranging from 0 to 100 mm and the vertical scale from 0 to 100 mm.

Solder Board-Component View 11	 A microscopic photograph showing a small, square, gold-colored component soldered onto a blue textured surface. The component has four circular solder pads at its corners. A black L-shaped ruler is placed next to the component for scale. The ruler has white markings in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale ranging from 0 to 90 mm.
Solder Board-Component View 12	 A microscopic photograph showing a small, square, gold-colored component soldered onto a blue textured surface. The component has four circular solder pads at its corners. A black L-shaped ruler is placed next to the component for scale. The ruler has white markings in millimeters, with the horizontal scale ranging from 0 to 100 mm and the vertical scale ranging from 0 to 90 mm.

Solder Board-Component View 13	 A photograph of a small, dark, rectangular component with a silver-colored metal tab on its top surface. The component is positioned on a blue textured surface. A black L-shaped ruler with white markings is placed next to it for scale. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is approximately 10 mm wide and 5 mm high.
Solder Board-Component View 14	 A photograph of the same component from a different angle, showing its side profile. The component has a black body with two yellow plastic connectors on its sides. A small silver-colored metal tab is visible on top. The component is placed on a blue textured surface next to the same black L-shaped ruler for scale. The ruler's vertical scale ranges from 0 to 100 mm, and the horizontal scale ranges from 0 to 100 mm. The component is approximately 10 mm wide and 5 mm high.
