View 1**

Solder Board-Component View 2	 A photograph of a small, rectangular electronic component, likely a switch, mounted on a blue solder mask. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component has two circular mounting holes on its left side and a central rectangular area with internal components. The text "SW312" is visible on the component.
Solder Board-Component View 3	 A photograph of the same electronic component from a different angle, showing the top surface. The component is mounted on a blue solder mask. It features a central square component with a crosshair symbol and an arrow pointing upwards. Two circular mounting holes are visible on the left side. The component is placed next to a black ruler with white markings, showing measurements in millimeters (0 to 100) and centimeters (0 to 10).

Solder Board-Component View 4	 A photograph of a small, square, black electronic component (SW312) mounted on a blue solder board. The component has two gold-colored circular pads on its left and right sides. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is placed vertically and horizontally to provide scale.
Solder Board-Component View 5	 A photograph of the same electronic component (SW321) from a different perspective. The component is black and rectangular, with two gold-colored circular pads on its left and right sides. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is placed vertically and horizontally to provide scale.

Solder Board-Component View 8	 A photograph of a small electronic component, labeled SW101, mounted on a blue solder mask. The component is rectangular with two gold-colored circular pads on the left and right sides. It is positioned next to a black ruler with white markings, showing a scale from 0 to 100 mm. The component is located approximately at the 25 mm mark on the ruler.
Solder Board-Component View 9	 A photograph of the same electronic component, labeled SW101, mounted on a blue solder mask. This view shows the component from a different angle, highlighting the gold-colored circular pads and the central component. It is positioned next to a black ruler with white markings, showing a scale from 0 to 100 mm. The component is located approximately at the 25 mm mark on the ruler.

Solder Board-Component View 16	 A photograph of a small electronic component, likely a USB dongle, placed on a blue surface next to a black ruler. The ruler has white markings in millimeters and centimeters. The component is positioned vertically, with its USB connector at the bottom. The ruler shows measurements from 0 to 100 mm.
Antenna View	 BT/WIFI Ant. A photograph of the same electronic component as in the first view, placed on a blue surface next to a black ruler. A red rectangular box highlights a small component on the top of the device. A red line points from this box to a label 'BT/WIFI Ant.' located below the image. The ruler shows measurements from 0 to 100 mm.

Model:ZK002

EUT Housing and Board View 1	
Solder Board-Component View 1	

Solder Board-Component View 2	 A top-down photograph of a small, square, black solder board component. The component has two gold-colored circular pads on the left and right sides. It is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 10) and centimeters (10 to 100). The component is positioned near the 10 mm mark on the ruler.
Solder Board-Component View 3	 A bottom-up photograph of the same solder board component. It shows a central square area with a crosshair symbol. The component is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 10) and centimeters (10 to 100). The component is positioned near the 10 mm mark on the ruler.

Solder Board-Component View 4	 A photograph of a small electronic component, labeled SW312, mounted on a blue solder mask. The component is rectangular with two circular pads on the left and right sides. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the component's width corresponding to the 10 mm mark.
Solder Board-Component View 5	 A photograph of the same electronic component, labeled SW321, mounted on a blue solder mask. The component is rectangular with two circular pads on the left and right sides. It is positioned next to a black ruler with white markings, showing dimensions in millimeters. The ruler is oriented vertically, with the component's width corresponding to the 10 mm mark.

Solder Board-Component View 6	 A photograph of a small electronic component, likely a DC-DC converter, mounted on a blue PCB. The component is black with two yellow circular solder pads on the left and right. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is oriented horizontally, and its top surface is visible.
Solder Board-Component View 7	 A photograph of the same electronic component from a different angle, showing its bottom surface. The component is black with two yellow circular solder pads on the left and right. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is oriented horizontally, and its bottom surface is visible.

Solder Board-Component View 8	 A photograph of a small electronic component, labeled 'SW101', mounted on a blue solder mask. The component is a rectangular switch with two gold-colored circular terminals on the left and right. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is located approximately at the 10 mm mark on the ruler.
Solder Board-Component View 9	 A photograph of the same electronic component, labeled 'SW101', mounted on a blue solder mask. This view shows the component from a different angle, highlighting the internal structure and the green solder joints. It is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100) and centimeters (0 to 10). The component is located approximately at the 10 mm mark on the ruler.
