Solder Board-Component View 14	 A photograph of a small, square, black printed circuit board (PCB) component. The component has four gold-colored circular solder pads at its corners and a central gold-colored connector. It is placed on a blue background next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's width being approximately 25 mm and its height approximately 20 mm.
Solder Board-Component View 15	 A photograph of a small, rectangular, black printed circuit board (PCB) component. The component has a gold-colored connector on one side and a central gold-colored chip. It is placed on a blue background next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component's width being approximately 15 mm and its height approximately 10 mm.

Solder Board-Component View 1	 A photograph of a small, square, black printed circuit board (PCB) component, identified as a solder board-component. The component is positioned on a blue surface next to a black L-shaped ruler for scale. The ruler has white markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component features a central square chip, several smaller components, and four gold-colored circular pads at the corners. The text "Solder Board-Component View 1" is printed in the left column of the table.
Solder Board-Component View 2	 A photograph of the same small, square, black printed circuit board (PCB) component, identified as a solder board-component, from a different perspective. The component is positioned on a blue surface next to a black L-shaped ruler for scale. The ruler has white markings in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component features a central square chip, several smaller components, and four gold-colored circular pads at the corners. The text "Solder Board-Component View 2" is printed in the left column of the table.

Solder Board-Component View 5	 A photograph of a small electronic component, likely a USB-to-serial converter, mounted on a printed circuit board (PCB). The component is positioned on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 20 mm. The component has a USB Type-C connector on one end and several pins or connectors on the other.
Solder Board-Component View 6	 A photograph of the same electronic component from a different angle, showing the underside or a side view. The component is still on the blue surface next to the black ruler. The ruler markings are visible, showing the component's width and position. The component's USB Type-C connector and various pins are clearly visible.

Solder Board-Component View 15	 A photograph of a small, square, black electronic component with a central square opening and two small circular holes on the sides. It is placed on a blue surface next to a black L-shaped ruler with white markings in millimeters. The component is positioned near the 10 mm mark on the vertical ruler and the 20 mm mark on the horizontal ruler.
Solder Board-Component View 16	 A photograph of the same electronic component from a different angle. It shows the component's top surface with two gold-colored pins at the bottom. The component is placed on a blue surface next to a black L-shaped ruler with white markings in millimeters. The component is positioned near the 10 mm mark on the vertical ruler and the 20 mm mark on the horizontal ruler. Text on the component includes "G2503" and "SW312".

Solder Board-Component View 17	 A photograph of a small electronic component, likely a micro-switch, mounted on a black printed circuit board (PCB). The component has a central square metal contact area with a crosshair symbol. It is flanked by two yellow cylindrical components. Two gold-colored circular pads are visible on the sides of the PCB. The assembly is placed on a blue background next to a black L-shaped ruler with white millimeter markings.
Solder Board-Component View 18	 A photograph of the same electronic component from a different angle. This view shows the top of the component, which is labeled 'SW312'. It features two gold-colored circular pads on the sides and two yellow cylindrical components. The component is mounted on a black PCB. A black L-shaped ruler with white millimeter markings is visible in the background.

Solder Board-Component View 19	 A photograph of a small electronic component, labeled SW321, mounted on a blue solder board. The component is positioned next to a black L-shaped ruler with white markings in millimeters. The component has two gold-colored circular pads on its left side and a small black rectangular body.
Solder Board-Component View 20	 A photograph of a small electronic component, labeled DC 24V5, mounted on a blue solder board. The component is positioned next to a black L-shaped ruler with white markings in millimeters. The component has two gold-colored circular pads on its left side and a small black rectangular body with several small white markings.

Solder Board-Component View 1	 A photograph of a small, square, black printed circuit board (PCB) component, identified as a solder board component. The component is positioned on a blue background. A black L-shaped ruler with white markings is placed next to it for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has four gold-colored circular pads at the corners and a central gold-colored pad. The text "Solder Board-Component View 1" is printed on the left side of the image.
Solder Board-Component View 2	 A photograph of the same small, square, black printed circuit board (PCB) component, identified as a solder board component. The component is positioned on a blue background. A black L-shaped ruler with white markings is placed next to it for scale. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has four gold-colored circular pads at the corners and a central gold-colored pad. The text "Solder Board-Component View 2" is printed on the left side of the image.

Solder Board-Component View 3	 A photograph showing a small, rectangular electronic component (solder board) with gold-colored contacts on its sides. The component is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, and the component is positioned near the 10 mm mark. The component has a central chip and various smaller components on its surface.
Solder Board-Component View 4	 A photograph showing the same solder board component from a different angle (View 4). The component is placed on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, and the component is positioned near the 10 mm mark. The component has a central chip and various smaller components on its surface.
