Model:ZK001(1#)(Bare products)

Solder Board-Component View 1	 A photograph of a small, square electronic component (likely a microcontroller or sensor) mounted on a blue solder mask. The component is positioned next to a black ruler with white markings. The ruler shows dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The component has four gold-colored mounting pads at the corners and a central square area with various components and markings.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing the underside. The component is mounted on a blue solder mask. It features a central square area with various components and markings, including a small yellow component. The component is positioned next to a black ruler with white markings, showing dimensions in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 5	 A photograph of a small, rectangular electronic component, likely a USB-to-UART bridge, mounted on a black printed circuit board (PCB). The component features a USB Type-C connector on one end and several surface-mount components, including a microcontroller and passive components. The PCB has four gold-plated mounting holes at the corners. The component is placed on a blue surface next to a black metric ruler with white markings, showing dimensions in millimeters.
Solder Board-Component View 6	 A photograph of the same electronic component from a different angle, showing the underside of the PCB. The component is mounted on a black PCB with four gold-plated mounting holes. The underside shows the solder joints and the components on the reverse side of the PCB. The component is placed on a blue surface next to a black metric ruler with white markings, showing dimensions in millimeters.

Solder Board-Component View 9	 A photograph of a small electronic component, likely a USB-to-UART bridge, mounted on a printed circuit board (PCB). The component is positioned on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 20 mm. The component has a USB connector on one end and a UART connector on the other. The PCB is populated with various surface components, including a microcontroller, resistors, and capacitors.
Solder Board-Component View 10	 A photograph of the same electronic component from a different angle, showing the underside of the PCB. The component is positioned on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length spanning approximately 20 mm. The underside of the PCB shows the solder joints and the components from the other side, including a microcontroller, resistors, and capacitors.
