

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden table. A red cable connects it to a device on the floor. The device is a rectangular unit with various ports and a red handle. It is connected to a power source via a black cable. The setup is in a room with a grey wall and a wooden table.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A white, box-like device is placed on a stand in the center of a room. The walls are covered with white, square-shaped electromagnetic interference (EMI) shields. A metal frame is visible in the foreground, and the floor is marked with yellow and black caution tape. The room appears to be an anechoic chamber or a specialized test environment.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
