

## Device Labelling

Device labels must include the following symbols that have to be visible, legible, and placed in a permanent way. Potting ensures long-term durability of the marking and must be applied such that marking is permanently visible and readable throughout the device lifetime.

- CE symbol – printed on PCB silk screen
- FCC symbol – printed on PCB silk screen
- Waste directive symbol – printed on PCB silk screen
- Operator's manual symbol – printed on PCB silk screen
- Serial number – printed on a sticker and placed onto the nRF52 as during PCB assembly; the sticker is equipped also with QR code that is used in provisioning process

## Package Labelling

Label must be included on the packaging, containing information on:

- Model
- FCC ID
- CE logo
- Waste directive symbol

Figure 2: Draft of the packaging label design.

The label will be engraved into the device plastics to ensure that it is readable throughout the device lifetime.
