

Type-C/Lightning  
User Manual

This product is a smart wireless microphone, which can provide professional recording output. Plug and play, no app required. Widely used: It can be used in online live broadcast, video Vlog shooting, program interview, recording, video teaching and other occasions.

The wireless microphone consists of three parts: one is microphone transmitter, one is receiver and charging case.

The product has two configurations: 1T1R and 2T1R. The manual is given. Please take the real object as the standard (as shown in the figure below)

- |                                |                                   |
|--------------------------------|-----------------------------------|
| ① Windproof net                | ⑦ indicator                       |
| ② The mute switch              | ⑧ Type-C/ Lightning port          |
| ③ Key                          | ⑨ Type-C/ Lightning charging port |
| ④ Microphone Clip              | ⑩ charging case power indicator   |
| ⑤ Charging and monitoring port |                                   |
| ⑥ indicator                    |                                   |
- NOTES:** Some Apple products may have incompatibility problems due to system, please consult your dealer for details.

Step 2: Take out the RX from the charging box, and insert the RX into the mobile device port. The blue light flashes, indicating that the RX is powered on and successfully linked with the mobile phone.

Notices: ① is a function key, which can shutdown of the TX, And it is a mode switch. ② can control the microphone recording and Pause recording. Please refer to UI menu for details.

Since the RX occupies the charging port of the mobile phone, if the mobile phone is low power at this time, the mobile phone can be charged through the type-C or lightning port of the RX.

| Transmitter TX |                                          |                                        |                                         |

 : 2T2R Wireless Microphone

Notices: The 1T1R Wireless Microphone is the same as that of 2T2R Wireless Microphone function operation. This user manual is shared.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure condition without restriction.
