Insert a data cable into the figure 2 USB output, and insert the other end into the corresponding device. The digital display flashes to indicate is charging of other devices

## Specification parameter

Cell type: Li-ion Polymer Cell  
Capacity:10000mAh/3.7V  
Input:DC 5V/2A(max)  
Output:DC 5V/2A(max)  
Size:86\*82\*25.5mm  
Net weight:220G

## Remark

Please charge for power bank in time if it doesn't respond when pressing the button or charging for other devices.  
The power bank should charge one time per 3 months at least

## Warning

Do not throw the power bank into the fire to avoid danger.

Avoid dropping the product on a hard surface

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
