1Summary

This report is mainly used to describe the 《Changfeng Electronics》
P1 antenna recognition letter.

2Machine description

P1 network mode is 2.4G,2.4G antenna at the bottom of the device,
PIFA.The antenna is a Integrated antenna

3Debug settings

3.1standing wave(VSWR)andReccho reflection(Return Loss)
VSWRIs using the Agilent E5062B connected to the terminal assembly to test, state for free
space。

3.2 TRP/TRS Tested in the ETS 5m× 4 m× 3 m 3D Dark Room using Agilent8960
(5513 C) 。

3.3Matching Circuit Description Match ha NO shave change,

2. 4G	Element		Value	According to the motherboard original board matching circuit is modified
		E2(0201)	NC	
		E2(0201)	0Ω	
		E3(0201)	NC	
		E4(0201)
