## 04 WARNINGS

1. Make sure that the paper bin is clean before using the printer. If there is any debris in the paper bin, the print head may be damaged during printing. In case of any debris, use a special cleaning device or alcohol to clean the paper bin and print head.
2. Turn off the power immediately when the printer malfunctions.
3. There are complex circuits and devices inside the printer, please do not disassemble the printer without authorization.
4. Charge the battery in a cool and airy room. Do not expose the printer and power adapter to high-temperature and high-humidity environments, or water to avoid short circuits that can cause the battery to heat up, smoke, deform, damage, or even explode. If the power adapter comes into contact with water or other liquid, cut off the power immediately. When you notice smoke or an odor from your printer or power adapter, unplug the power adapter immediately and take care to avoid burns.
5. Please do not squeeze, mechanical vibration, shake the printer and power adapter, remove or modify the power adapter. It is forbidden to use the power adapter when the power cord is damaged, otherwise it will cause electric shock, fire and damage to the power adapter
6. When unplugging the printer, grab the power adapter. Pulling the power cable will damage the cable.
7. Do not use the printer near flammable products such as gas stations and fuel warehouses.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **RF Exposure Information**

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
