①. 3M glue is pasted on the helmet fastener and stuck on the helmet, and the other fastener is fixed on the machine

第 6 页

6.Install the TF /SD card

- ①.Confirm that the camera is turned off before installation.
- ②.Open the silicone cover of the micro SD card holder on the camera.
- ③.Insert a micro SD card into the card slot according to the direction of the micro SD card in the card slot.

- ④.After micro SD is installed, cover the silicone cover of the card slot.

III. Product Specifications

Video format:	MP4;H.264 compresses agreement
Photo format	JPG(6400X4800;5120X3840;4320X3240; 4216X2376; 3840X2160;2592X1944;1920X1080)
Video resolution:	3840X2160_4k@30fps; 2560X1440_2k@30fps 1920X1080_1080P@30fps; 1920X1080_1080P@60fps 1280X720_720P@60fps; 1280X720_720P@120fps
Supported system:	Windows XP/7/Vista/8/10; Mac OS X 10.4above; Linux;
Optical frequency	50HZ,60HZ
Interface medium:	Type-c
Battery type	2200mAh polymer lithium battery
Working time:	Camera shooting continues about 5 hours (Turn off WIFI)
Size and weight:	29*27*103(mm),75g
Storage support:	Support 8—512GB micro SD card (Recommended to use U3 TF card)
Input:	DC-5V---1000-2000mA

IV. Safety Precautions :

Please observe the following basic safety precautions when using this product.

- 1.Do not let this product get damp or soak in water, and keep it away from direct sunlight and heat.
- 2.Please be careful not to let it be stepped on or put items on it when connecting the power cord, causing it to squeeze. Special attention should be paid to protecting the connectors of the power line connection equipment.
- 3.Please use the 5V, 500-2000MAH power adapter or desktop computer or charging treasure to charge. Charger charging beyond the current and voltage may cause harm.
- 4.Do not remove the case or repair it yourself.
- 5.If it is not used for a long time, it should be filled every three months.
- 6.The temperature range of this product is -20 °C ~ ~ 50 °C. Exceeding this

temperature range may cause setting failure.

7. Please maintain a distance of at least 15CM from the implanted medical device (eg. cardiac pacing/inject-able cochlea).

8. The contents of this manual and the specifications of this product are subject to change without notice.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
