FCC WARNING
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, and (2) this device must accept any interference received. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance, such modifications could void the user's authority to operate the equipment.
The device has been evaluated to meet general RF exposure requirement.
This equipment complies with FCC's RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna(s) must not be co-located or in conjunction with any other antenna or transmitter.

2 **Battery Information**

2.1 Charging Precautions

If the battery of product runs out or without being used for quite a long time, please charge the product before using. The battery capacity can be optimized by charging / discharging for 2-3 cycles. The battery needs to be charged when the power is low.

Cautions

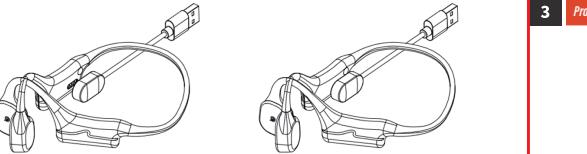

- ◆ Please DO NOT throw the battery into fire.
- ◆ While charging the product, please power it off to ensure that the battery can be fully charged.
- ◆ Please DO NOT always connect the product with charging cable after the battery is fully charged, continuously charging will shorten the battery life.
- ◆ Please DO NOT charge the product with fully charged battery, it may reduce the cycle life of battery.
- ◆ Please try to keep the battery in an indoor environment of about 25 °C. The battery is prone to failure when the temperature is lower than 10 °C for a long time.
- ◆ When the temperature is higher than 35 °C or lower than -10 °C, the discharge capacity of the battery may decrease, which is determined by the physical characteristics of the lithium battery.

2.2 Battery Charging

(1) Plug the power adapter of 5V 1000mA into qualified AC power output socket.
(2) Connect the magnetic charge cable with the charging port of product.
(3) Red flowing indicator indicates that currently the battery is charged with low power. Yellow flowing indicator indicates that currently the battery is charged with medium power.
(4) Green breath indicator is on after the battery is charged for around 4 hours. And the indicator is out after 5 minutes, it indicates that the battery is fully charged.
(5) Disconnect the magnetic charging cable after the indicator is out for 30 minutes to an hour, so the battery reaches the best condition.
(6) Unplug the power adapter from AC power output socket.
