## Precautions

1. Please use original accessories to avoid compatibility issues and insufficient current supply from non-compatible accessories. For example, 2-in-1 or 3-in-1 cigar sockets will not provide enough current to the device.
2. Please do not tamper or splice the rear camera wire for the purpose of extension, as the rear image/feed to the display may be lost. The length of the included cable for the rear camera is 20 feet, and is suitable for most types of cars.
3. Minimum Micro SD card requirement: Class 10 (10MB/s) micro SD card over 32G storage, with FAT 32 format.
4. For further inquiries, please contact our customer service via email at [service@wolfbox.com](mailto:service@wolfbox.com).

## Warnings

- Keep small accessories out of the reach of children. If this product is damaged or malfunctions, stop using it immediately and contact WOLFBOX support. Continue use may cause fire, electric shock or vehicle failure.
- This product is intended to be used as reference material in the event of an accident. We do not guarantee its effectiveness or admission as complete evidence.
- Please note that this product may infringe on privacy and other rights depending on how it is used. We are not responsible for any cases where this product infringes on privacy or other rights.
- This product is for DC12V/24V vehicles only.
- The specifications and appearance of this product are subject

to change without notice for improvement.

## Product Overview

- Thank you for choosing WOLFBOX G900 Pro Mirror Dash Cam. This product provides a high-quality image and captures irrefutable evidence in the event of an accident, and records the beauty along the way for you.
- WOLFBOX is a professional automotive supplies manufacturing company. We have worked in the field of dash cams for more than ten years. We have a team of experienced and imaginative engineers who are committed to building a reliable and trustworthy automotive supplies brand.

## Warranty

- We are committed to giving customers the best product experience and after-sale service.
- Our warranty period is one year. If the machine parts are damaged or there are any problems during use, we will solve them in time and provide you with a satisfactory shopping experience.

**Note: The specific warranty period is subject to local laws.**

- Please contact us with your online order, and we will provide free replacement and lifetime technical support.
- **Free extended warranty service:** After registering information on WOLFBOX.com, you may extend the warranty for an additional 6 months free of charge.

| <br>Help Center         | /      | After-sales contact information.          |

## Note:

Parking Mode requires a hardwire kit (purchased separately) in order to activate.

With the hardwire kit connected and Parking Mode enabled, the dash cam will enter Lapse Recording mode when the car turns off. This mode captures video at 1 frame per second until the set duration ends or the car battery voltage drops below 12V.

## Voice Control Feature

Fast control through simple voice commands.

When the recording interface displays a white icon , it means that the Voice Control feature is activated.

You can enable/disable the voice control feature through the "Voice Control" in the menu.

|                   |                    |
|-------------------|--------------------|
| lock the video    |                    |
| take picture      |                    |
| turn on audio     | turn off audio     |
| turn on screen    | turn off screen    |
| turn on Wi-Fi     | turn off Wi-Fi     |
| turn on recording | turn off recording |
| show front camera | show rear camera   |

### Note:

You have two ways to view specific voice control commands:

- 1 Tap on the voice control icon  on the recording interface.
- 2 Tap on the "Voice Command" submenu under the "Voice Control" feature.

## Play on APP (About Wi-Fi and APP)

The Wi-Fi feature has been designed so you can pair your dash camera wirelessly with your smartphone and access your recordings instantly from the dash cam. Here you can view, download and share your videos easily with your friends and family.

The app “WOLFBOS” is a free app that allows you to operate this WLAN built-in drive recorder from your smartphone.

### • How to connect Wi-Fi?

#### 1. Download the “WOLFBOS” app

Go to the following address to download the “WOLFBOS” app: <https://wolfbox.com/app/> You may also use your smartphone to scan the QR code to go to the download page.

#### 2. Enable Wi-Fi

Go to Settings to turn on the Wi-Fi. Then, the device screen will display the Wi-Fi name and password.

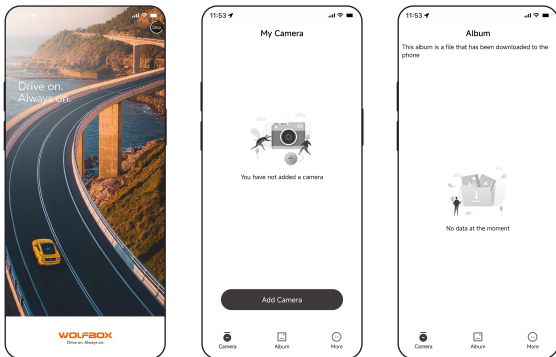

#### 3. Connect Wi-Fi

To connect your iPhone or Android phone to the G900 Pro's Wi-Fi network, go to Settings > Wi-Fi and select G900 Pro Wi-Fi. Then, enter the default **password: 12345678**.

#### 4. Open the “WOLFBOS” app

Once your mobile phone is connected to the G900 Pro's Wi-Fi network, open the WOLFBOS app. The camera will sync automatically, and you should see the live video feed on your phone.

- **Download, edit and share your video clip via Wolfbox App**

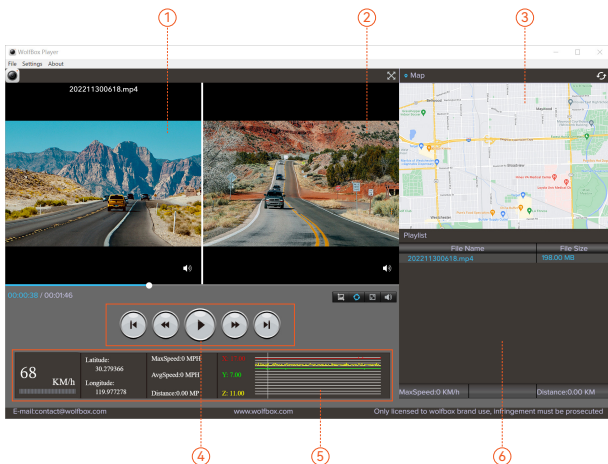

In the app, you can view and edit downloaded local albums and share them with others.

## How to play video on computer

We recommend the application “GPS Media Player” to watch and play dash cam videos, and view Google Maps.

You can download it for free on Mac or Windows from the following link: <https://wolfbox.com/gps-player/>

- ① Video play window (Front)
- ② Video play window (Rear)
- ③ Map and track display
- ④ Play control panel
- ⑤ Speed and driving state indication
- ⑥ Play list

### Note:

If you record the front and rear dash cam videos simultaneously and add them to the playlist, you can play them side by side in split-screen mode.

To play a video file, drag and drop it onto the video player.

## Installation

Before installing your dash cam, please test its functionality with all accessories and change the default settings to your preference.

### • SD card installation

Ensure that the dash cam is powered off when inserting or ejecting the SD card.

• The Front view of the host

• The Back view of the host

### • Unit installation

1. Place the head unit (WOLFBOX Mirror) on the rear-view mirror by hand, and be sure to separate the silicone brackets on both sides of the rearview mirror. Buckle the device to the rearview mirror with the rubber straps. Adjust the front lens to a desired angle.

2. Connect the car charger to the charger adapter to supply power for the dash cam.

### • Power ON/OFF

- Short press the power button to turn on, long press the power button to turn off.
- When using the car charger, if the cigarette lighter port is ACC, the dash cam will automatically turn on when the car is started.

### • Rear camera installation

If you don't need to adjust the angle, you can remove this iron plate.

- Outside the car bracket

- Inside the car bracket

## • Rear Camera Wiring Instructions

① Dash camera

② Connected to reversing light

③ Outside the car bracket

④ Inside the car bracket

### **Note:**

The rear camera has two wire routing options, both of which conceal the wire along the edges of the door.

### **1. Connect the rear camera cable to the mirror**

Plug the rear camera cable into the AV interface of the unit.

## 2. Rear camera cable routing

Route the rear camera cable to the rear of the car, leaving some slack. Insert the cable into the gap in the front windshield and along the upper end of the door using the included tool.

If you choose to install the rear camera inside your car, fix it on the rear windshield after routing the wiring.

## 3. Remove the panel

Open the trunk and remove the interior panel that covers the other side of the license plate mount area. Use a trim removal tool or other thin device to pry the panel open.

#### 4. Fix the rear camera and connect the cables

Fix the rear camera near the license plate light with 3M glue, and connect the rear camera cable through the license plate light hole to the rear camera cable.

#### 5. Connect the red wire to the reverse light's positive terminal

Find the positive terminal of the reverse light. This is the terminal that has voltage when the car is in reverse gear. To find it, step on the brakes, put the car in reverse gear and measure the voltage at each terminal. The terminal with voltage is the positive terminal. Strip the positive cable and wrap it with the red cable from the camera. Insulate the connection with electrical tape. Test the connection by putting the car in reverse gear and seeing if the dash cam enters reverse mode.

## • GPS Installation

### Position 1:

Install the dash cam in the right corner of the central console and hide the wiring along the edge of the front windshield using double-sided tape.

- Considering the use effect and installation convenience, we usually recommend customers install it at **position 1**.
- You may also test different locations for the dash cam to find the one that works best for you. Just make sure that the black side is facing up to receive the GPS signal.
- Once the GPS is installed, the GPS icon on the home screen will appear. After the GPS signal has been received, the device's GPS will show direction and speed.

## Trouble Shooting

- **Can rear camera images be transmitted wirelessly?**

The G900 Pro Wi-Fi comes with a rear camera cable through which the rear camera video is transmitted. The Wi-Fi feature is only used to connect the phone to the dash cam.

- **Is it possible to monitor the vehicle remotely via Wi-Fi on the G900 Pro?**

Considering the limited Wi-Fi range, it is not possible to monitor the vehicle remotely via the App connecting to G900 Pro.

- **Rear camera image blurred or not detected?**

For "Blurred rear image" issue, please make sure that the protective film on the lens is removed and wipe the lens with a cleaner. If the focusing issues are caused by high temperatures, please contact us for support.

If you are getting a "Rear camera not detected" error, check the AV input on the top of the mirror and the rear camera cable for damage, especially at the connector.

- **How to connect the unit to App via Wi-Fi?**

1. Please make sure that Wi-Fi is turned on manually in settings.
2. Search for "WOLFBX" in the app store to download the latest version of the app.
3. Check the Wi-Fi list on your smartphone to see if the network named "WOLFBX" can be found.
4. If the app displays "Connection Failed", please find "Get Support" in the app to contact us.

## Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

RF Exposure Statement

To maintain compliance with FCC's RF Exposure guidelines, this equipment should be

installed and operated with minimum distance of 20cm the radiator your body. This device

and its antenna(s) must not be co-located or operation in conjunction with any other antenna nr transmitter.

IC warning:

This device contains licence-exempt transmitter(s)/receiver(s)/ that comply with Innovation Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

1) this device may not cause interference and

2) this device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure: This equipment complies with Canada radiation

exposure limits set forth for an uncontrolled environment; To maintain compliance with IC's RF Exposure guidelines.

This equipment should be. installed and operated with minimum distance of 20cm the radiator your body. This

device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
