

instructions

usage method

1. Insert the GB small module of ivygrow into the weight card slot on the bottom of the mouse, and the magnetic suction is aligned automatically. After installation in place, place the mouse on the supporting wireless charging board to realize wireless charging. (to be aligned with the charging area)
2. During wireless charging, you can check the charging status on the mouse driver page (please make sure the driver is updated to 2022.3.24300 and above)

matters needing attention

1. In order to avoid situations such as high temperature, charging interruption, or lack of recognition caused by the mismatch of wireless chargers, please use the officially designated wireless charging board.
2. The mouse itself has a battery protection mechanism. When it is charged to more than 80%, the displayed power remains unchanged (the maximum power percentage displayed by each model of mouse is different, which is related to the mouse firmware). There are problems with non rechargeable devices.
3. During charging, when the power of the mouse is more than 80%, please stop using the wireless charger in time to avoid damaging the equipment due to high temperature caused by overcharge for a long time.
4. This product has been tested in detail before leaving the factory. If the charging is abnormal, there may be the following reasons:
 - 4.1. The power plug of the wireless charger does not meet the requirements;

- 4.2. Not using the officially designated wireless charger;
- 4.3. Abnormal display of mouse and computer driver;
- 4.4. The magnet on the bottom of the mouse is dirty;
- 4.5. The mouse and wireless charger failed to align with the charging position;

FCC statement:

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
