

Brief introduction:

- (1) Output 1: 5V/1A
- (2) Output 2: 5V/2A
- (3) Micro USB Input: 5V/2A
- (4) Type C Input: 5V/2A
- (5) Power button ON/OFF (Switch Button)
- (6) Wireless Charging Output Area
- (7) LED display to show battery capacity

Use Operation:

Charge other device

- (a) Use a suitable cable to connect the power bank and other device together to charge
(*Remarks: This charged device is suitable for 5V charge voltage)
- (b) Before the 1st use, suggest to fully charge power bank at first.
- (c) Put a Smartphone which have Qi Wireless Charging function to the area (6), put at the center place to make sure the wireless charging is high efficiency.

Charge power bank

- (a) Use the Micro USB Cable or Type C Cable to connect power bank and 5V adaptor(or computer or other power sources) to charge power bank
- (b) During charging power bank, LED display is flashing: it will display from 1%-99%. After fully charged, LED light will stop flashing and become 4 LED lights always on.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

FCC Radiation Exposure Statement

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located for operating in conjunction with any other antenna or transmitter.
