>30cm
**4**
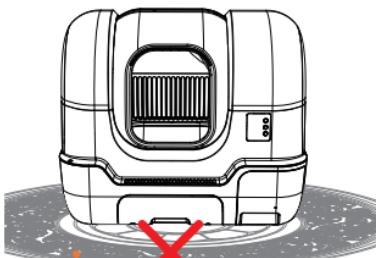

Carpet

Ensure the device is placed at least 0.3 meters away from the wall and positioned on a flat, hard floor. Do not place it on a carpet.

*Placing the device too close to the wall or on an uneven surface may result in inaccurate weight detection and operational errors.*
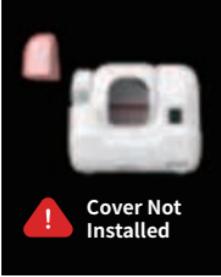

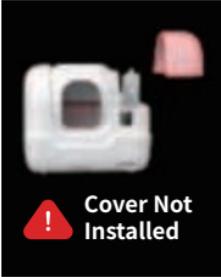

# Funtion Instructions

## 4-1Funtional Descriptions

| Icons | Function Description | Function Explanation |
|---|---|---|
| | Immediate Cleaning | Start the scooping process to clean urine clumps and feces. |
| | Immediate Flattening | Flatten the litter inside the roller after litter addition. |
| | Immediate Litter Replacement | Empty the litter in the roller and dispose of it in the litter tray. |
| | Immediate Packaging | Automatically package and seal the waste bag. |
| | Immediate Odor Control | Activate the odor eliminator and ozone generator for deodorizing. |
| | Opening Facing Up | Position the roller opening facing up to facilitate manual litter addition. |
| | Device Networking | Connect or reconnect the device to the network. |
| | Weighing Calibration | Recalibrate the weight measurement. *Note: recalibrate if you change or add new litter, or if the weight measurement is inaccurate.* |
| EN | Language Settings | Switch the language. |

# Automatic Litter Replacement

*Note: Do not leave the device unattended during operation.*

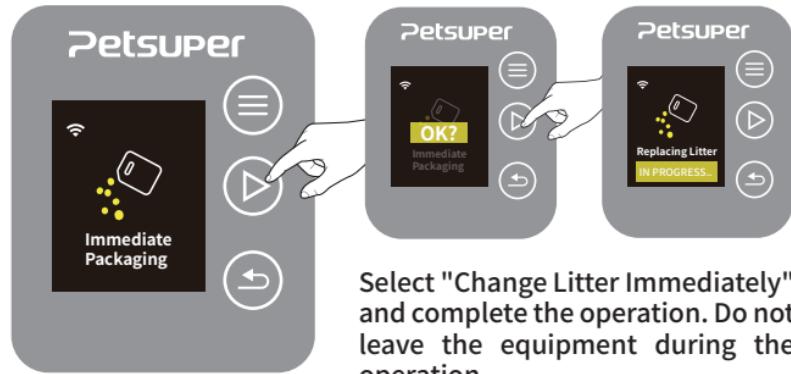

Select "Change Litter Immediately" and complete the operation. Do not leave the equipment during the operation.

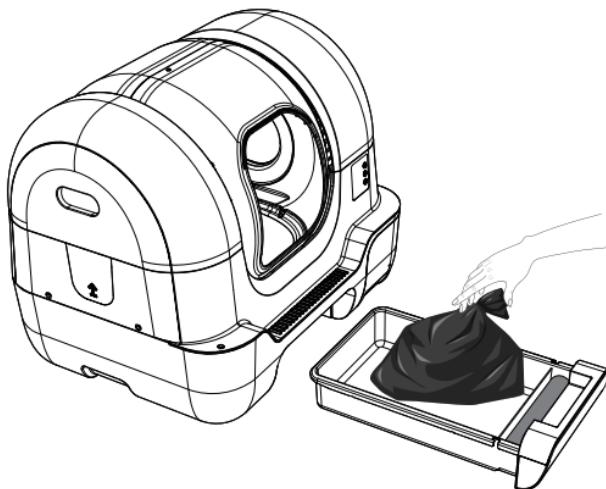

Remove the waste litter after the litter replacement is completed

# Waste Packaging Funtion Instructions

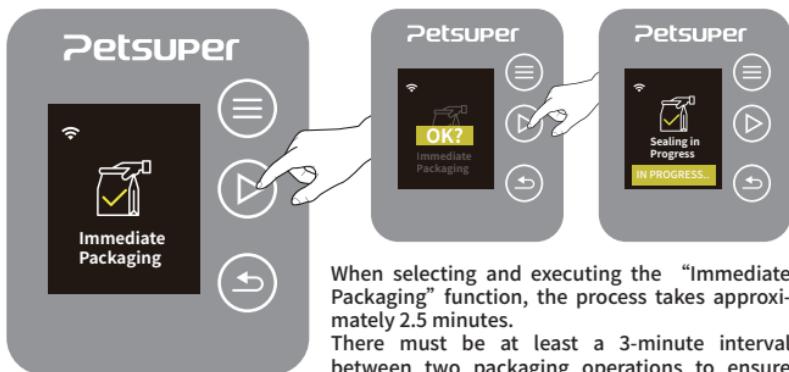

When selecting and executing the "Immediate Packaging" function, the process takes approximately 2.5 minutes.
There must be at least a 3-minute interval between two packaging operations to ensure proper sealing performance.

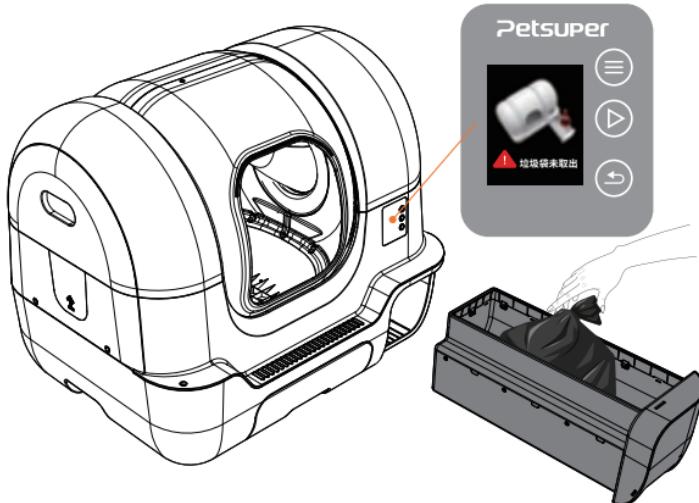

After sealing is complete, pull out the waste bin, remove the waste, and return the bin to its original position.

# Replace the Waste Bag

**1**

Remove the Right Side Cover.

**2**

Open the Lid.

**3**

Replace

Remove the waste box and replace the waste bag. Press the waste bag down to the bottom of the bin to ensure it is properly installed and fully spread inside the waste bin.

# Replace the Waste Bag

**4**

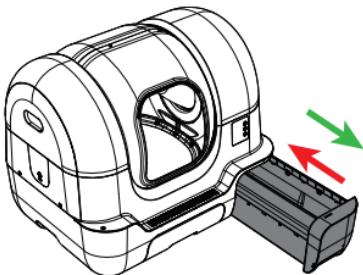

1.Pull out the waste bin, then push it back to activate the sensor.

2.Go to the "Waste bag can be sealed" section in the app and tap the "Reset" Button to reset the counter.

12:00

< **Replace the Waste Bag** ✎

**The waste bag can be sealed approximately 30 times.** Reset

*Due to variations in the size of waste clumps and each elimination, please adjust the setting according to actual usage. It's recommended to set the number of uses to be one or two fewer than the actual usage.*
