

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT. On the left is a small green printed circuit board (PCB) populated with various electronic components including capacitors, resistors, and integrated circuits. To the right of the PCB is a white plastic housing with two rectangular cutouts. Both items are placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the components, showing measurements in millimeters.
Solder Board-Component View 1	 A close-up photograph of the green PCB component. The board is populated with various electronic components, including capacitors, resistors, and integrated circuits. The board is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters.

Solder Board-Component View 2	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '2', resting on a blue textured surface. The component is positioned between two black rulers. The ruler on the left is oriented vertically and shows markings from 0 to 100 mm. The ruler on the bottom is oriented horizontally and also shows markings from 0 to 100 mm. The component itself is dark with various electronic components like resistors and capacitors visible. It has a large, irregular silver-colored solder pad on its left side.
Solder Board-Component View 3	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '3', resting on a blue textured surface. The component is positioned between two black rulers. The ruler on the left is oriented vertically and shows markings from 0 to 100 mm. The ruler on the bottom is oriented horizontally and also shows markings from 0 to 100 mm. The component is dark with various electronic components like resistors, capacitors, and a transformer visible. It has a large, irregular silver-colored solder pad on its left side.

Solder Board-Component View 4	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '4', resting on a blue textured surface. The component is populated with various electronic components, including integrated circuits, resistors, and capacitors. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically, with the component's length corresponding to the 10 to 80 mm range.
Solder Board-Component View 5	 A photograph of a small, rectangular printed circuit board (PCB) component, labeled '5', resting on a blue textured surface. The component is populated with various electronic components, including integrated circuits, resistors, and capacitors. It is positioned next to a black ruler with white markings, which shows dimensions in millimeters. The ruler is oriented vertically, with the component's length corresponding to the 10 to 40 mm range.

Solder Board-Component View 6	 A photograph showing a small blue electronic component, likely a module, mounted on a black PCB. The component is positioned near a ruler with millimeter markings. The component has several pins and labels, including "3V3", "GND", "RX1", "TX1", "P24", and "P25". A red box highlights the component.
Antenna View	WIFI+BT Antenna  A photograph showing the same blue electronic component from a different angle, highlighting the antenna area. A red box highlights the antenna area, and a red line points from the "WIFI+BT Antenna" label to this box. The component is positioned near a ruler with millimeter markings.
