Smart Pet Feeder Wide Angle Video Version  
(Supports 2.4GHz WiFi Only)

**uHome+**

Products will be upgraded from time to time (including APP), please refer to the actual product!

# Safety Instructions

Dispose of all packaging materials properly. Some items may be packed in plastic bags; these bags could cause suffocation. Keep them away from children and pets.

Do not immerse the base part in water at any time as it may damage electronic components like the control panel.

Suggest following the instruction in this user manual to assemble or disassemble the feeder.

Only use accessories recommended or sold by the manufacturer. The use of accessories not recommended or sold by the manufacturer may cause an unsafe condition.

Examine the feeder after installation. Do not plug in if there is water on the power cable or plug.

This product uses built-in battery as a backup power supply. We recommend to use double power supply to ensure the normal use of the product.

If the product is not used for an extended period, please fully charge the battery to reduce the rate of natural discharge.

Do not put your fingers into the food outlet or let your fingers touch the rotor.

Keep the feeder close to your router, make sure the network signal is good, it is ideal to make it within 5 meters without obstacles and walls. (Depending on the coverage of the router you are using)

Please do not use wet, canned or moist food; only put dry food into the food tank prevent from abnormal conditions even may including pet safety problems.

Manual Instruction x1

# Product Overview

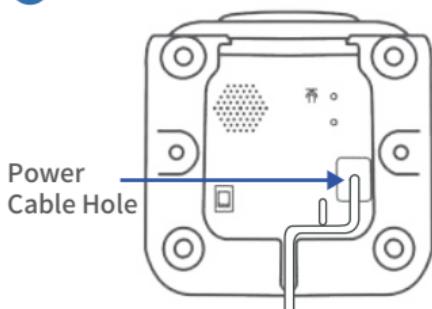

**Warning: Please keep the feeder base dry and do not wash it!**

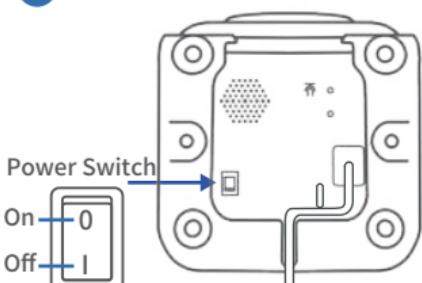

# Installation

## STEP 1 Connecting Power

1

2

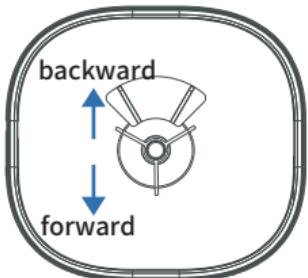

- Check the bottom of the device and plug in the USB cable.

- Turn on the power switch at the bottom of the feeder.

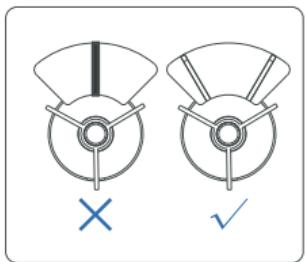

Note: Be sure to turn on the power switch before use. Please maintain dual power supply, batteries are for backup power only

## STEP 2 Assemble or Disassemble

3

4

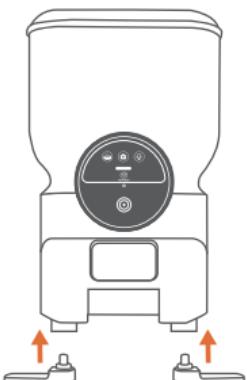

- When installing the food impeller: Please pay attention to the impeller direction.

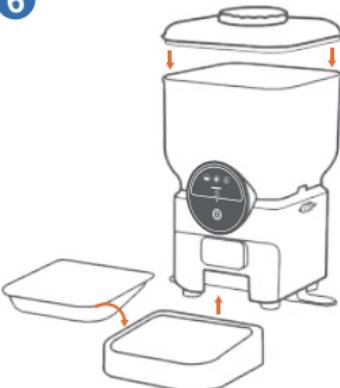

- Pay attention to the direction of the impeller; the impeller should not be placed in the center.

## STEP 3 Assembling the Food Tray

5

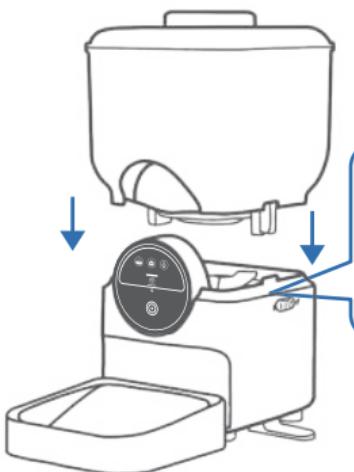

6

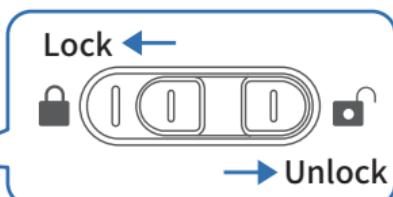

- First, install the fixing brackets from the bottom.

- Align the bulging of the bowl tray and the holes in the feeder base, and push up ward to connect the two. Put on the stainless steel feeding bowl

7

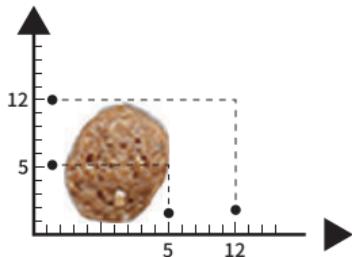

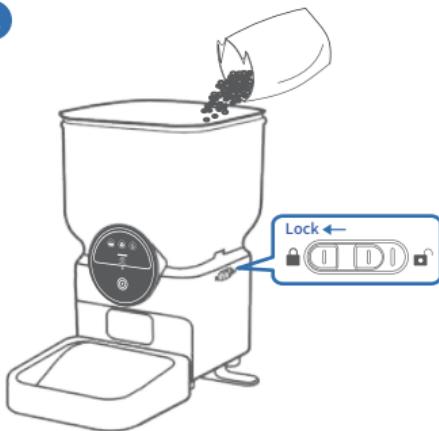

The food tank can be installed only in Unlock Position

- Slide the buckle to Unlock position, then insert the food tank into the feeder base, and then slide the buckle to the locked position.

## STEP 4 Fill With Food

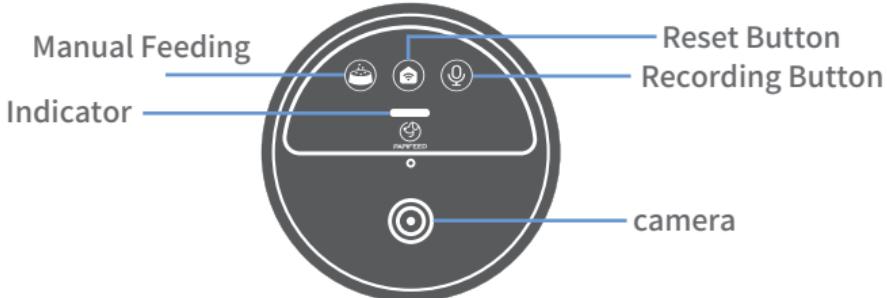

8

Note: It is recommended to use round or oval-shaped pet food, as long strips or irregular shapes such as polygons are prone to getting stuck.

- Pour in dry pet food. Put on the lid.

# Product Interface and Button Description

	Recording Button	Press and hold the button for 5 seconds until the device emits a "beep-beep~" sound. Release the button, and the device will start recording. To end recording, short press the button. The device will beep to confirm, and the recording will be saved (supports recordings up to 10 seconds, overwriting the previous recording).
	WIFI Reset Button	Press and hold the button for 10–20 seconds until the device emits a "ding-dong~" sound and the red/blue lights flash alternately. This indicates the device is in network pairing mode.
	Feeding Button	Short press the button once to dispense a portion of food (manual feeding, no limit on the number of times). If a recording is saved, the device will play the audio while dispensing food.

## Indicator Light Descriptions

Indicator	Status
	Waiting for connection
	Connection successful
	Connection timed out
	Low battery indication (when using battery power only)

Note: If the device remains unconnected for over 3 minutes, it will emit a "beep-beep" sound and enter the blue blinking light state. Press and hold the "WIFI" icon button for about 15 seconds to reset the device. A "ding-dong" sound will indicate a successful reset, after which you can reconnect the device.

## Tutorial Video

■ You can scan the Tutorial Video QR code to watch how to connect.

Made in China

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
