

Product brand: **FIRSTBLOOD**
Item model number: B67
Transmission method: wired USB + 2.4G + BT three-mode
Interface type: key line separated Type-C interface
Product size: 333.1 x 124.1 x 54mm
Product weight: 1135g
Shell material: acrylic transparent
Wire length: 1.8M
Lighting effect: RGB, 18 groups
Key layout: 67 key layout
Support system: WindowsXP/Vista/Windows7/8/10/11

1. Deep sleep
After 30 minutes of no key operation on the keyboard, deep standby, Bluetooth disconnection and sleep, press any key to wake up the keyboard backlight and connect back to Bluetooth;
2. Power saving sleep
The backlight will be turned off after 5 minutes of no key operation on the keyboard, press any key to wake up the keyboard backlight and connect back to Bluetooth;
3. Power display
Press the FN+Back key combination (supports 2.4G/Bluetooth mode), the backlight turns off, and the number keys 1 to 0 light up to display the power ratio, for example: 1 is on, it means 10% power, 1 and 2 are on, it means 20% power;
4. Low battery display
The FN key indicates the low-power charge indication: The FN key light flashes in low power mode, the FN key light is always on when charging, and the FN light returns to the default state when fully charged. (connect in any wireless mode Plug in the USB cable to charge the device)

1. When the switch is turned to the wired gear, it is the wired connection mode
Wired mode, toggle the switch to the middle, USB plug and play;
2. When the switch is turned to the Bluetooth gear, the Bluetooth connection mode
FN+Q/W/E: Press and hold the FN+Q/W/E key combination for 3S at this time, the keyboard enters the pairing state, the indicator light corresponding to Q/W/E flashes white rapidly, the Bluetooth connection is successful, and the device indicator (Q/W/E) to stop blinking.
3. Bluetooth device switching: This product supports the control and storage of 3 Bluetooth devices, through FN+Q, FN+W, FN+Q/W/E to select and call among the three successfully paired Bluetooth devices, when switching paired devices, the keyboard The light flashes slowly and enters the reconnection state. If the switch is successful, the backlight flashes to restore the state. The reconnection time is 30s, the pairing time is 120s, and the timeout enters deep sleep.
4. 2.4G code pairing: 2.4G mode, toggle the switch to the left, the receiver can be used when plugged into the computer. (Note: The factory keyboard and the receiver have been paired successfully. Press and hold the FN+R key combination for 3 seconds, the R key light flashes to enter the code pairing, and the R key indicator light stops flashing when the code is successfully paired)

FN+[] Light effect switching, 18 kinds of light effects cycle in turn:
 FN+T/Y/U = Three sets of game lighting effects can be customized
 FN+Y = Default FPS mode = W/A/S/D/J / $\downarrow$ / $\leftarrow$ / $\rightarrow$
 FN+T = Default LOL mode = Q/W/E/R/D/G/F/B/V/L-Alt/L-Tab/Space/1-6/ESC
 FN+U = Default 37-key office mode: A-Z 26 English letters / [1]/[2]/[3]/[4]/[5]/[6]/[7]/[8]/[9]/[0]/[11]/[12]/[13]/[14]/[15] / $\leftarrow$ / $\rightarrow$
 FN+U = Record game lighting mode for the above three game mode lighting effects, press the button once during recording to create a color, a total of 7 colors
 N+7 = light brightness + (five gears), when the overall backlight is adjusted to the limit, it flashes 3 times to indicate
 FN+ $\downarrow$ = Light brightness - (five gears), the overall backlight is turned off when it is adjusted to the limit
 FN+ $\leftarrow$ = dynamic light direction switch
 FN+ $\rightarrow$ = toggle backlight color

FN+1 = F7	FN+2 = F8	FN+3 = F3	FN+4 = F4	FN+5 = F5	FN+6 = F6
FN+7 = F7	FN+8 = F8	FN+9 = F9	FN+10 = F10	FN+11 = F11	FN+12 = F12
FN+ESC = ~	FN+Z = previous track	FN+B = volume-	FN+X = Pause/playback	FN+N = Mute	FN+C = next track
FN+V = volume+	FN+B = volume-	FN+S = MAC			
FN+A = WIN (default)					
FN+Left Ctrl = Numeric area or F1 function key area exchange					
FN+WIN-L = Lock the WIN key, the WIN key will light up in white after locking					
FN+HOME = Ins	FN+DEL = END	FN+PGUP = PRtSC	FN+PGDN = Scrlk		

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
