APPLICABLE EQUIPMENT

- This product supports fast wireless charging and complies with the Qi wireless charging standard. Through the magnetic induction should be short distance radio transmission, the equipment supports all compliant with the Qi standard wireless charging devices. With protocol QC2.0/QC3.0/PD adapter, wireless charging supports 15W load, With over voltage and over temperature protection.

ATTENTION POINTS

- To use wireless charging, make sure your phone has wireless charging capabilities.
- When the battery is low, it will beep and the ambient light will flash, suggesting charging.
- Use the QC3.0 adapter for best results.
- Please avoid thick cases (>0.07 inches) and other accessories when charging your device.
- Mobile phones below iPhone8 do not support wireless charging, such as iPhone5, 5S, 6, 6S, and 7.
- Do not use or store the product in direct sunlight or high temperature places for a long time.
- Do not charge in places too close to magnetic cards, magnetic recording media, and precision instruments.
- Do not disassemble or modify this product.
- Keep this product away from water or other liquids.

BASIC PARAMETER

Model: PX-05
Material: ABS/ Silica/ PCBA/PC
Input: DC 5V/3A 9V/2A
Power: 18W
Wireless Power: 15W
Speaker Power: 8W*2
Product size: 9.0x4.65x3.62 inch
Origin : Shenzhen China
Charging port: Universal Type-C

PACKAGE

Wireless Charging Music Lamp	x 1
Power Adapter	x 1
Power Cord	x 1
User Manual	x 1

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
