

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden bench. A red cable connects it to a power line interface unit (PLI) mounted on a metal surface. The PLI is connected to a power source. A black rectangular object, possibly a shield or a component, is placed on the metal surface. The background is a plain wall with a power outlet.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup in an anechoic chamber. The walls are covered with white, square-shaped electromagnetic absorbers. A metal frame structure is visible in the foreground, and a small object is placed on a table in the background. The floor is marked with yellow and black caution tape.

**Radiation Emission Test
Setup (30MHz to 1GHz)**

**Radiation Emission Test
Setup (1GHz to 18GHz)**

**Radiation Emission Test
Setup (Above 18GHz)**
