12 pro/12 pro max/12 min/iphone13

Thank you for purchasing our product. For optimum performance and safety, please read these instructions carefully before operating the product. Please keep this manual for future reference.

### Summary

With the iPhone wireless carplay dongle, you can make your car with wired carplay function become wireless carplay. You can easily enjoy music, navigation, Siri ... by wireless.

No need App, just plug and play, support all lightning iPhone models and new iOS 15

### How to use

1. Connect the wireless carplay dongle to the car's original USB or USB-C data interface. The wireless carplay dongle's LED light will open and operate the car screen to stay on the Carplay page, waiting for connection.
2. Turn on the Bluetooth and Wi-Fi of the iPhone, search for the Bluetooth signal name "smartdongle-\*\*\*\*\*" to connect and pair.
3. Choose the iPhone Bluetooth name "smartdongle-\*\*\*\*\*" and click pair, then click "Use Carplay" will successfully connect. You can start to enjoy wireless carplay with your iPhone inside your car.

### Note:

- 1: The wireless Carplay dongle only can work with iPhone, not other smartphones and tablets.
- 2: No support the car that does not have Carplay function, only work with the car that has wired Carplay function.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
