15W Fast Wireless Charging

Before Using

This document will help you identify problems and get the most out of your experience with our wireless chargers.

It is important to note that although wireless chargers are a transformatively convenient way to charge, they are not yet capable of the charging speeds provided by traditional wired chargers.

Attachments (Must-Read!)

If you're experiencing interrupted or slow charging, check the following:

The back of your phone should not have any metal, pop sockets, or credit cards.

Put the phone in the center of the charging surface (this lets the charging coil in your phone line up with the one inside the wireless charger).

The wireless charging coil on Sony phones is located slightly below center.

Phone cases should be no thicker than 5 mm for effective charging.

Choose the correct adapter for your wireless charger:

Quick charge or power delivery adapter for fast charge modes.

5V/3A adapter for standard charge mode.

Not compatible with 5V/1A adapters.

Function Display

More Fun

This new decorative lamp wireless charging supports the replacement of the decorations in the lampshade, and you can put your favorite decorations on it.(Need attention the size of the decoration can't exceed the size of the lampshade.)

Further Steps

If you have any questions:

Please reach out to us via message center.

To expedite your case, please have the following information at hand: your phone's model, the problem you are having, and the type of phone case you are using (with a link if possible). Optionally, you may include a video to illustrate the problem you are having.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
